

Moonfish-1

Picks based on palynological analysis by Shell.
Seismic Markers based on interpretations by Shell.

TD: 3045 mKB*
KB: 23 m

*Note - TD was 3045 mKB, however wireline logs only run down to 2368 mKB as a major boundary fault was intersected, thereby cutting out the secondary objective (*F. longus* sands). The well was therefore sidetracked.
