  - 6.0 SERVICE COMPANIES AND 3<sup>RD</sup> PARTY CONTRACTORS**
  - 7.0 ACCOMMODATION / HIRE CARS**

**1. PURPOSE**

To provide a comprehensive, standardised and up to date communication list for general and emergency communications.

**2. SCOPE**

The Emergency Contact List will form an addendum to all Drilling Department documents that require contact information. These documents will include Oil Spill Contingency Plans, Emergency Response Plans, Programmes, Field Operations Manuals and for general contact information. This list includes contacts for Apache operational and management personnel, Apache field facilities, contractors, authorities, other oil companies, medical facilities, community support groups etc. The intent is to have a single communication list that can be better managed than a system where different documents have individual lists that become out of date and not routinely updated. This list replaces those currently held in the above documents.

**3. RESPONSIBILITY**

The Drilling Manager is responsible for ensuring that the list is continuously revised and kept current. The Drilling Manager delegates the responsibility for the issue of the Emergency Contact List as required.

**4. REVISION**

This document will be controlled and issued under the Apache document control procedure. All holders of this document will be issued with updated revision information in accordance with the approved procedure. Apache will endeavour to incorporate changes as they occur. It is the responsibility of all personnel to inform the Drilling Manager of changes within their area of responsibility.

**5. DISTRIBUTION**

The distribution of this document will be as required to satisfy the needs of the various Apache documents and operations at any time. The distribution list will be maintained as described above.

**6. CONTACT LISTS**
