SPECIES LIST

	1900	1500	2000	2500	3000	3500	4000	4500	5000	5500	6000	6500		
ARENACEOUS BENTHONICS														
95. Textularia semicarinata														
94. T. sp.2														
95. T. ototara														
96. Vulvulina granulosa														
97. Pseudoclavulina rudis			.	.										
98. Gaudyrina heywoodensis														
99. Dorothyia sp. (smooth)														
100. Gaudyrina convexa														
101. Farreriella sp.														
102. Haeuderella pukeuriensis														
103. Eggerella sp. (robust)														
104. Bathysiphon sp.														
105. Ammodiscus parri														
106. Amosphaeroidina sphaeroidiniformis														
107. Flabellarina sp.														
108. Haplophragmoides spp.														
109. "Alveolophragmium" cf. H. paupera														
ERYZOA														
SPONGE SPICULES														
ECHINOID SPINES														
CARBONACEOUS MATTER														
"COGONIA"														
"GLAUCONITE" - green														
"GLAUCONITE" - oxidized														
QUARTZ - angular														
depth	1000	2150			3200				5150	5600	6000	6200	6500	6500
ZONE	A	B		C				D)-1		D-2	E F+G	H	I	J-1

All depths are drilled depths at datum +51'

T = side wall cores.

I = over 20.

/ = well preserved

/ = worn fragments
