ATTENTION: MR. W. H. NIXON.

> SUBJECT: MUD AND CUTTINGS ANALYSIS

WEST SEACOMBE NO. 1 WELL

VICTORIA.

GENTLEMEN:

A CORE LABORATORIES AUSTRALIA combination drill cuttings and hydrocarbon detection unit was present at the site of the subject well during drilling operations from 120 feet to the Total Depth of 5,793 feet.

Utilising standard equipment, the drilling fluid was monitored continuously from 120 feet to Total Depth, and the drill cuttings were checked at regular intervals for oil and gas content and lithology. The results of these operations are shown on the accompanying Grapholog.

HYDROCARBON SHOWS: There were no significant shows of oil or gas. At 2,800 feet to 3,450 feet a slight increase of Methane was recorded due to the coal measures.

We sincerely appreciate this opportunity to have been of service, and trust the information furnished in this report and during drilling operations has assisted in the evaluation of the subject well.

Yours very truly,

CORE LABORATORIES AUSTRALIA (QLD) LTD.
