

LEGEND

- Subsurface contours on top of 'Otway Group' intervals 100 feet. 0 = Sea level. Full lines based on subsurface controls. Broken lines are assumed positions.
- Deeper subsurface control from well data
- Seismic reflection traverses
- Post-Early Cretaceous fault lines, approximate positions. Arrows toward downthrown block
- Thick wedging section of sediments indicated by seismic survey

Approximate boundaries between older Tertiary stratigraphic units beneath younger superficial deposits

- "Balcombian"
- Torquay Group
- Demon's Bluff Formation
- Boonah Sandstone  
Eastern View Coal Measures
- Exposed Otway Group
- Basal conglomerate of Otway Group
- Cambrian diabase
