

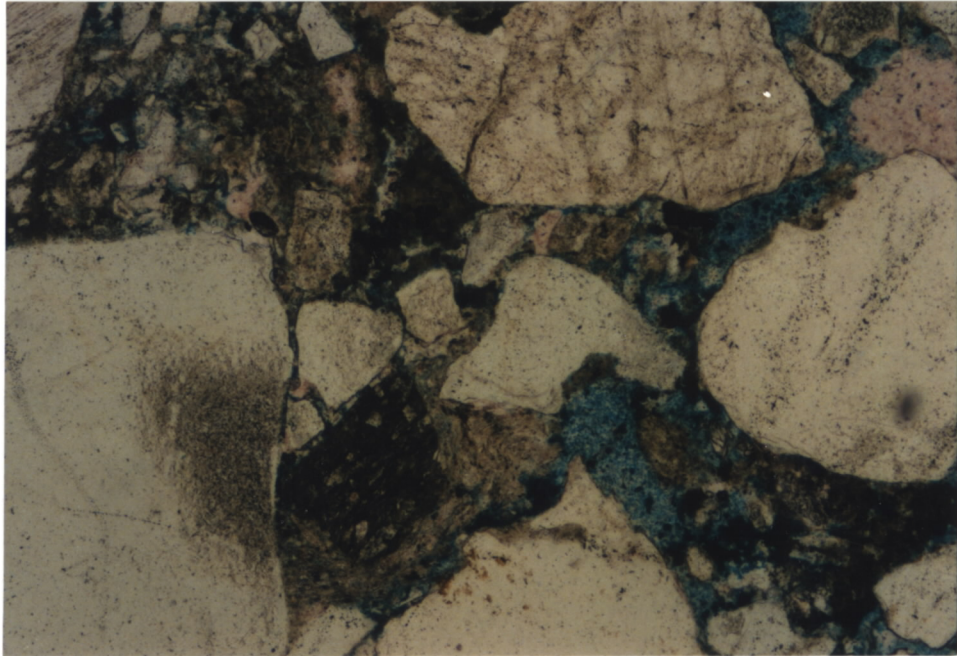

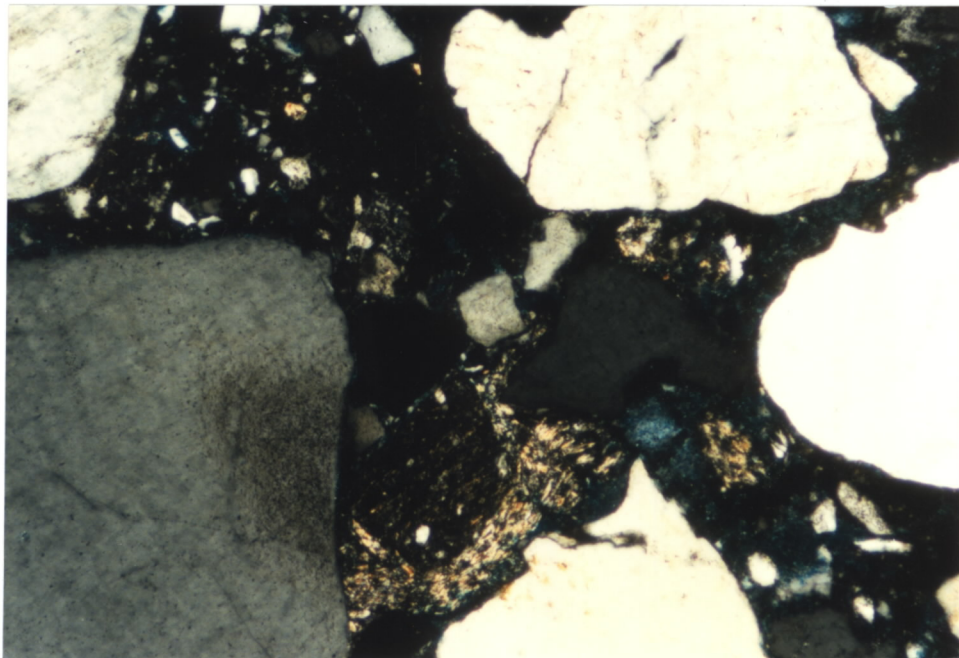

PLATE 1

SAMPLE: Core 5, 1041.5m: TSC47275

a. Plane Light

(10)

b. Crossed Nicols

(11, 12)

0.5 mm

Detrital quartz grains and feldspar grains (large grain in upper part of field) with interstitial clay and porosity. In this and all other photomicrographs the porosity will be represented by a blue impregnation medium.
