

7. FIGURES AND CAPTIONS

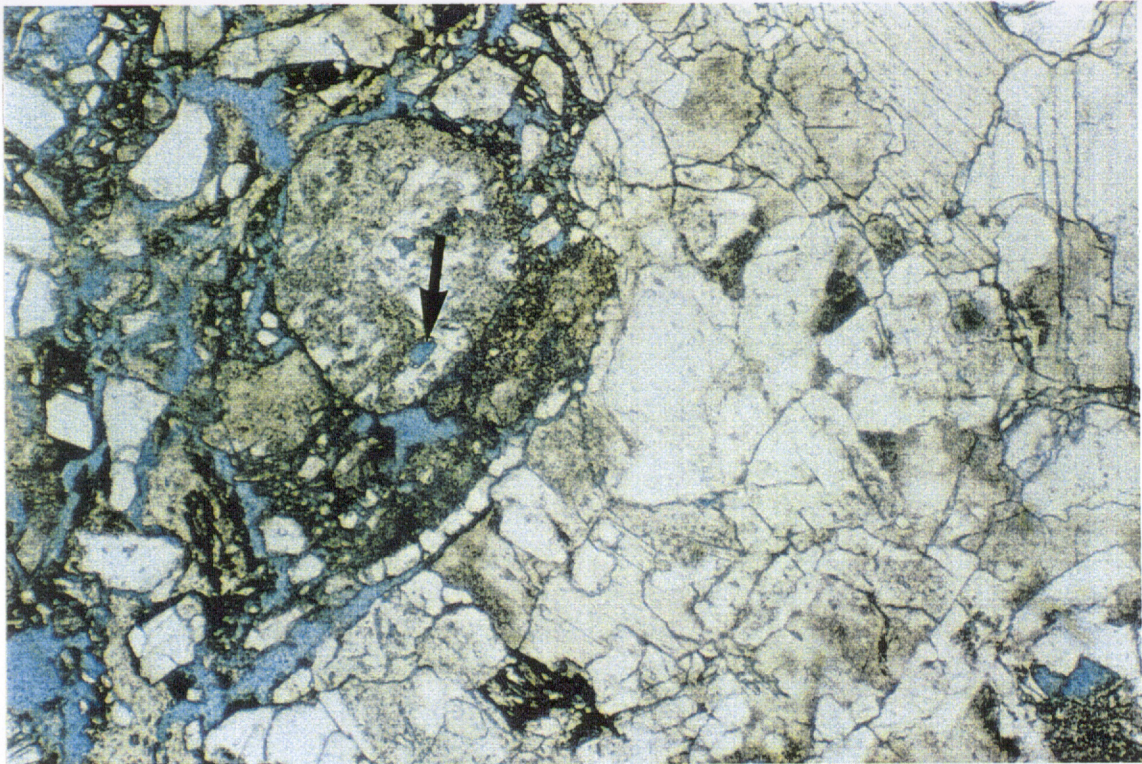

Figure 1a. Thin section photomicrograph of granular granite. The sample is highly disturbed with trace amounts of secondary dissolution pores (arrow). Mudskipper #1, depth 1615.0m. Plane light. Field of view 2.40mm.

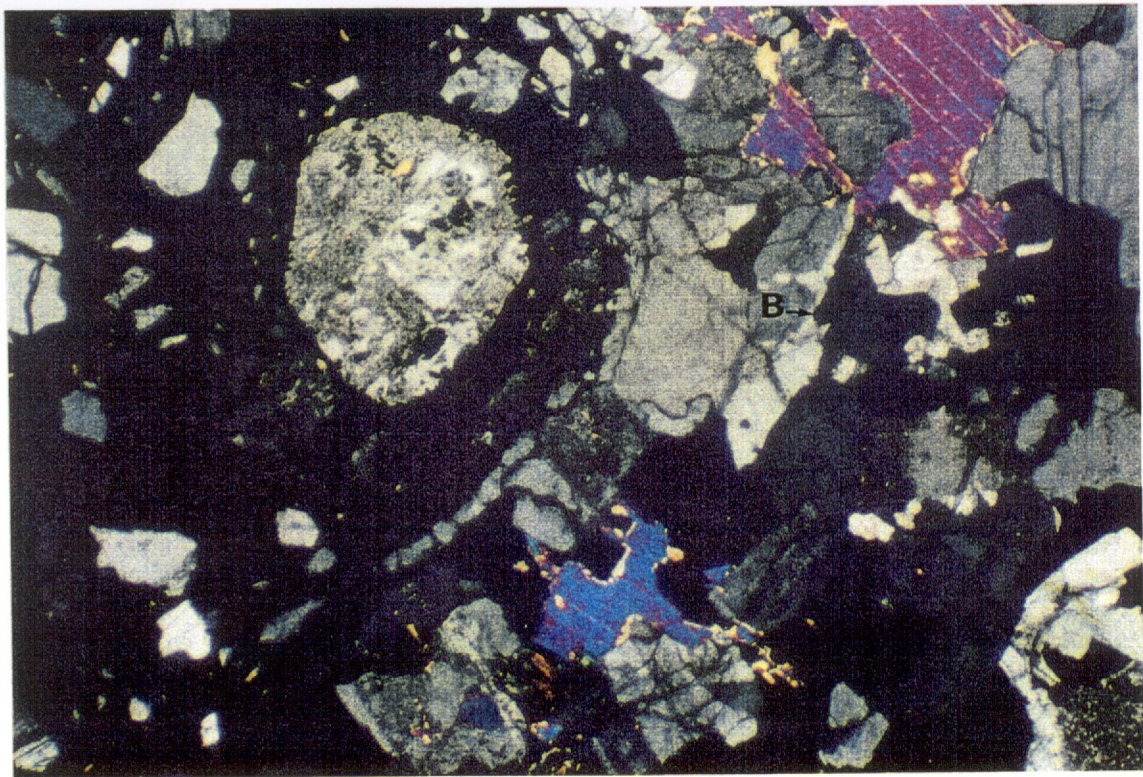

Figure 1b. Same field of view as Figure 1a in crossed nicols. Slightly interdigitating boundaries (B) indicate a consertal texture.
