

# **CREW SAFETY MEETING**

**13-12-99 Mess 12:30**

Chairman: Dave Coughlan

Secretary: Lyall Cowin

This was a short safety meeting called to inform the crew of decisions made at a safety committee meeting held the day before regarding the wearing of PPE on the gun deck. The crew will commence deploying cables tonight.

The entire gundeck is now a hard hat area with no exceptions.

Workvests are required to be worn at all times aft of the aft end of the gun strings. There are no exceptions to this.

Shift leaders are responsible for ensuring there are sufficient workvests available in work areas.

Hard hats will be issued to those who do not have them.

Shift leaders were asked to make sure that personnel working six to six are informed of these PPE requirements.

Meeting ended at 12:40.
