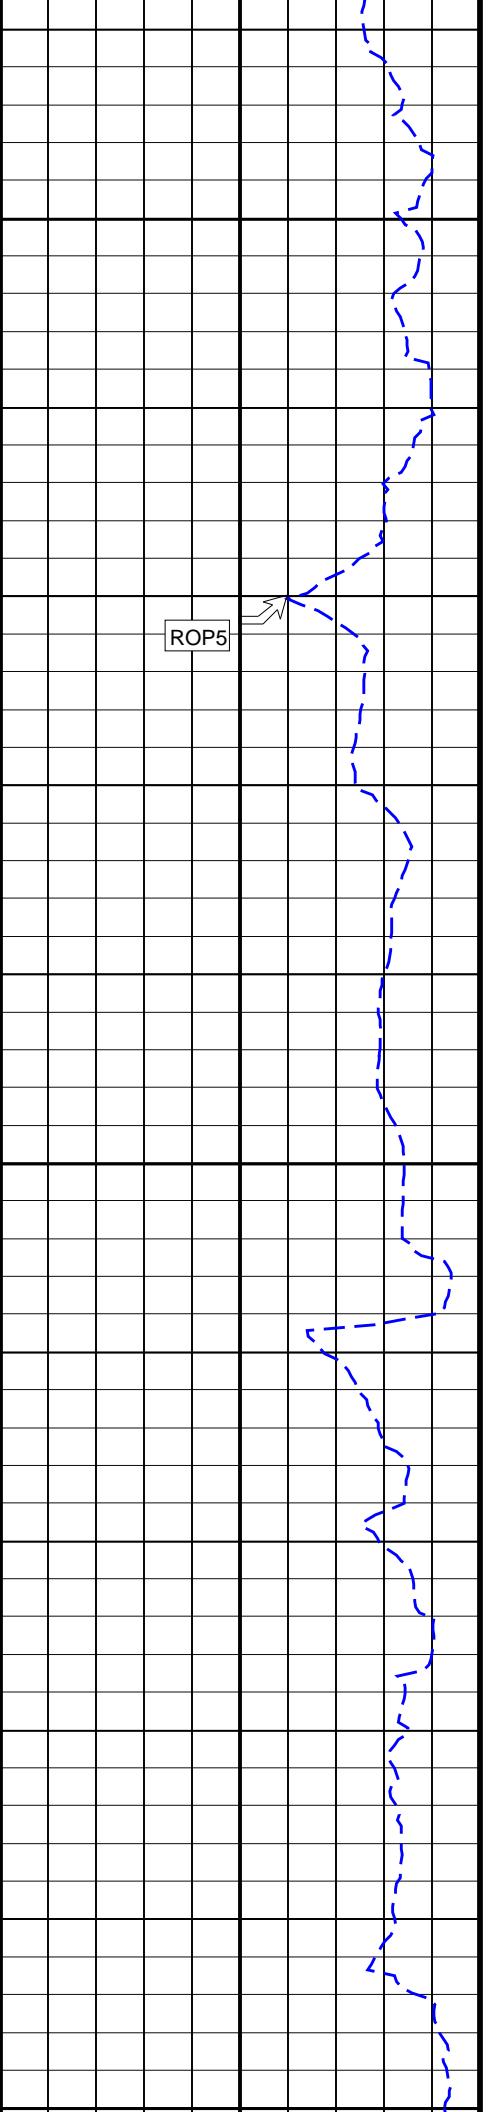

Graphics File Created: 30-Nov-2005 02:43

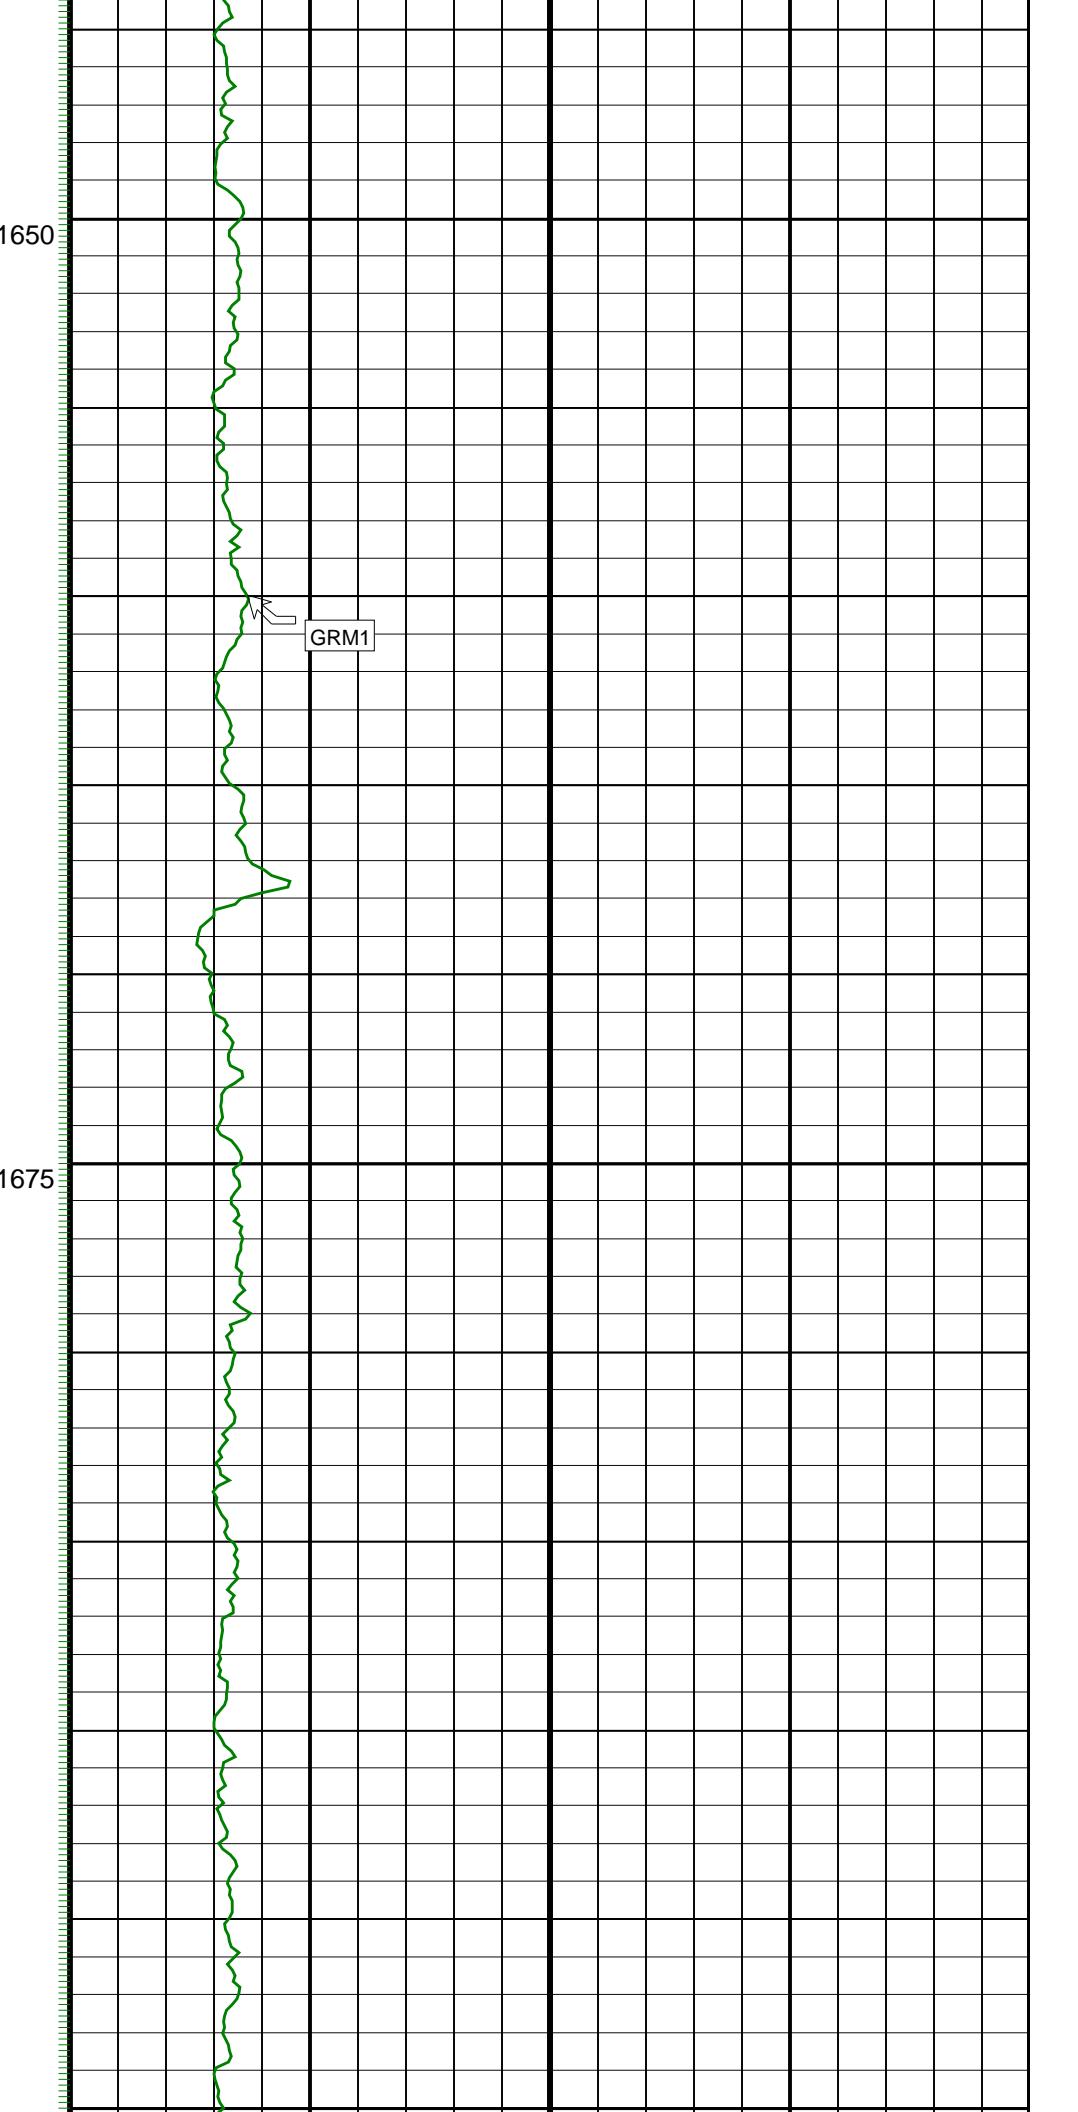

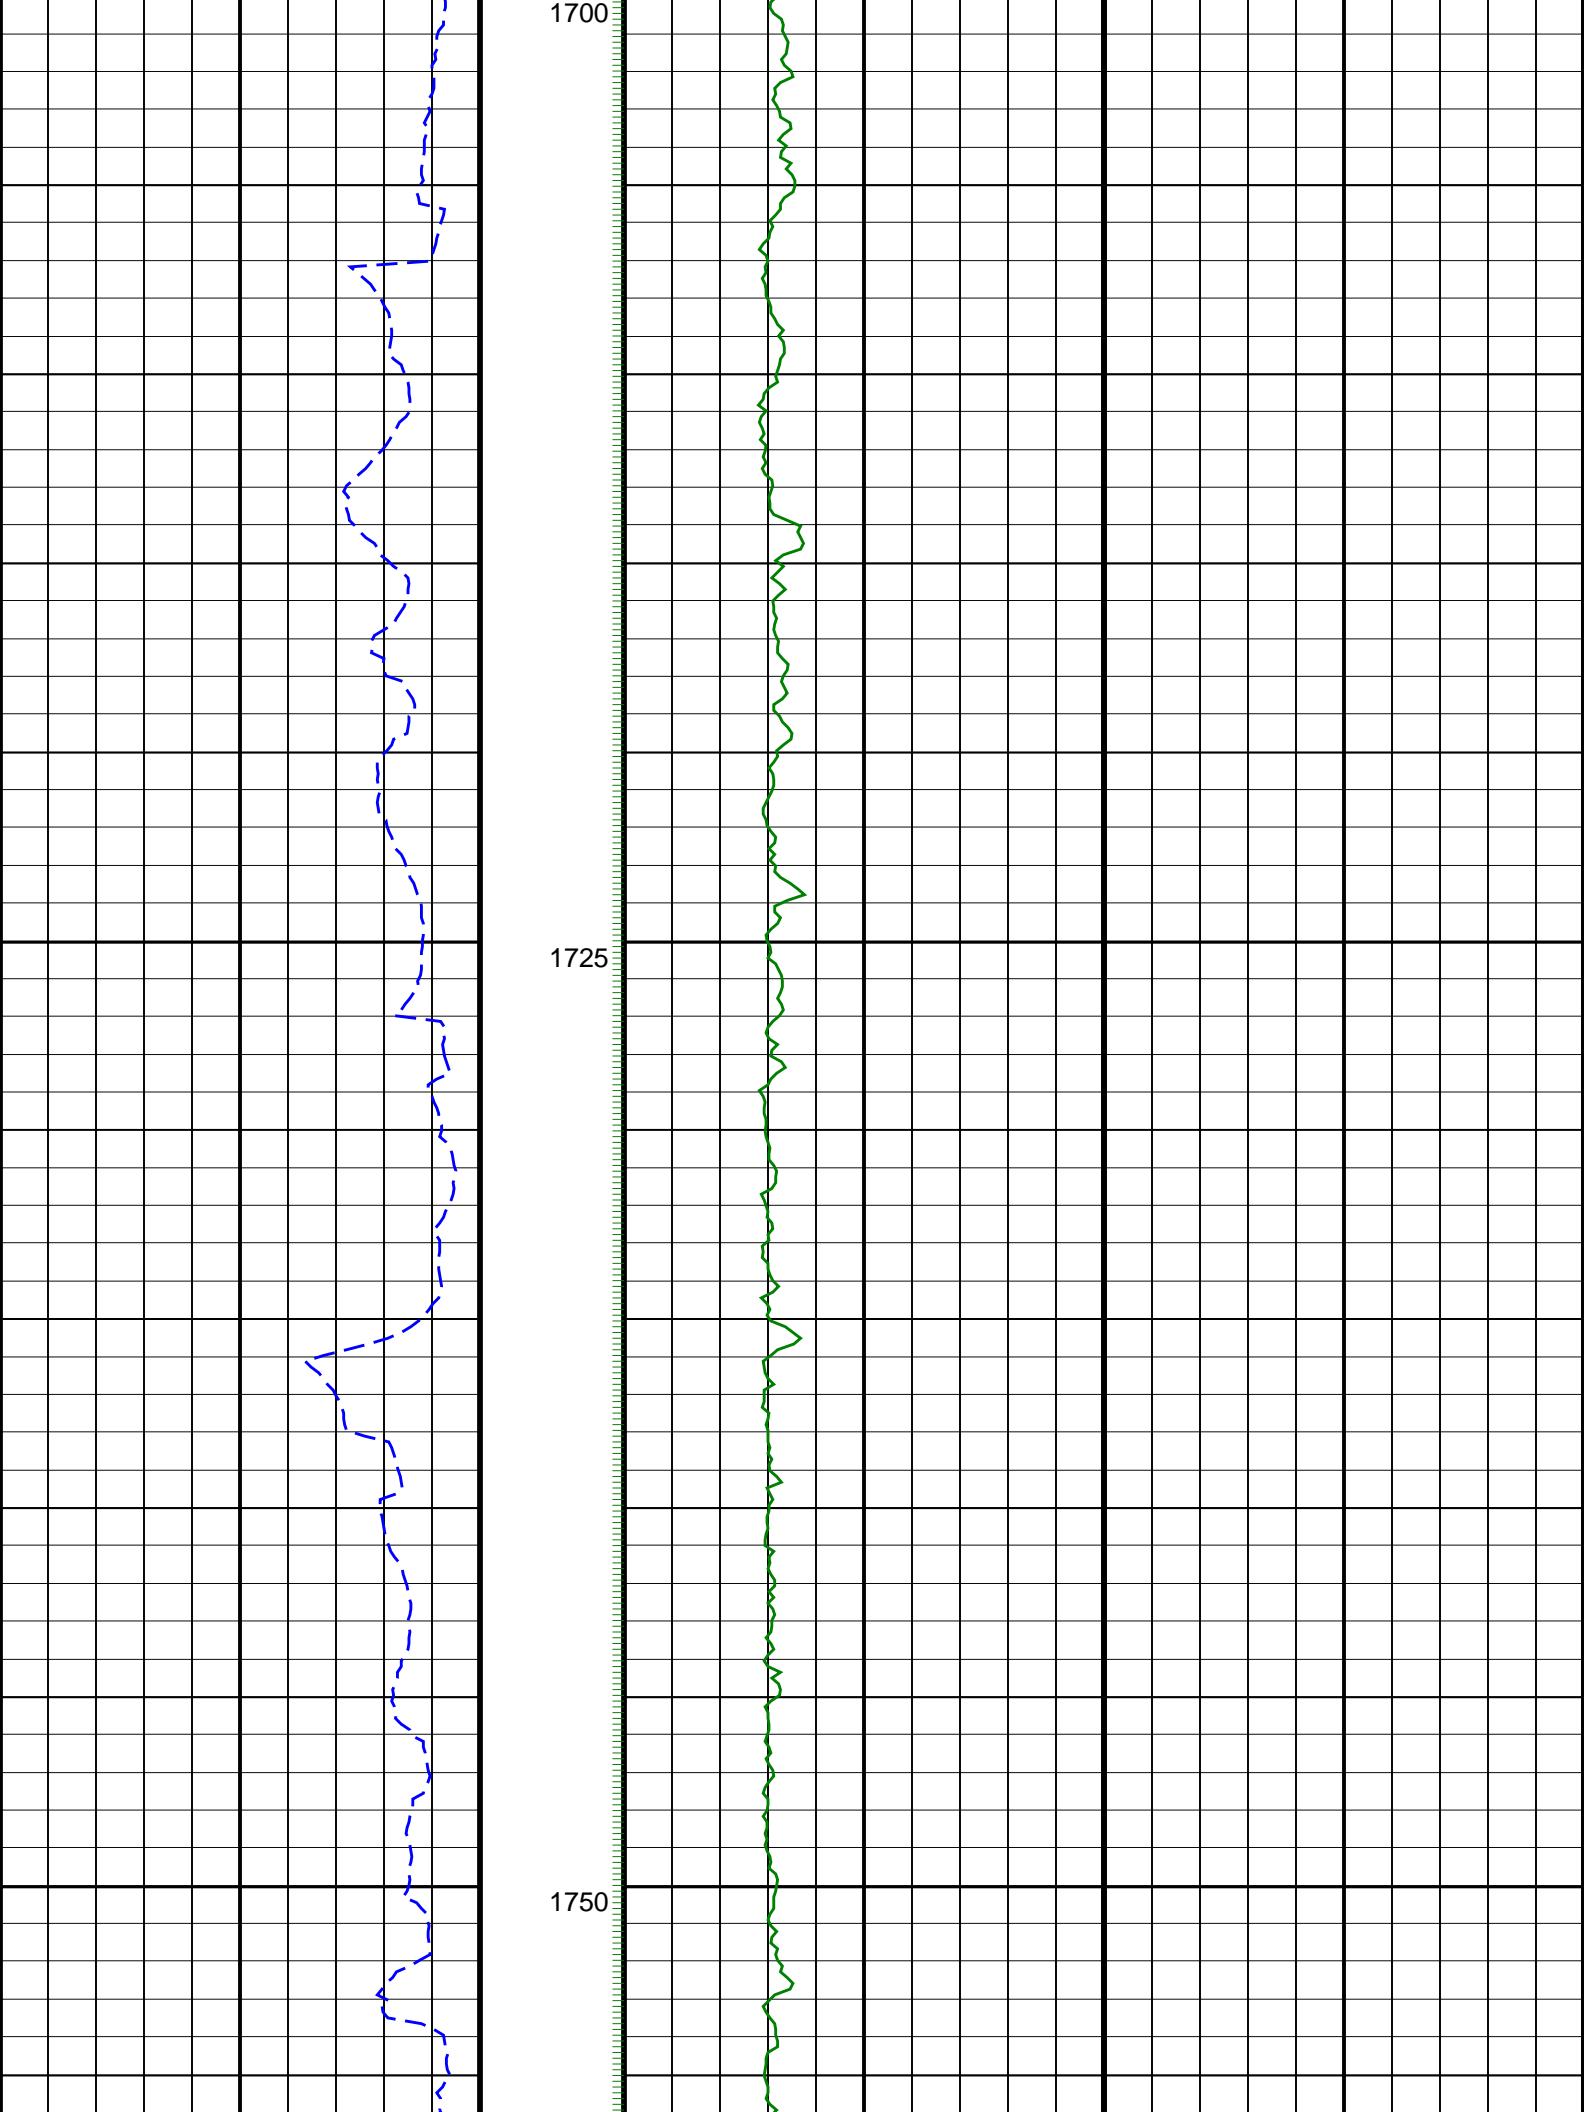

ROP5

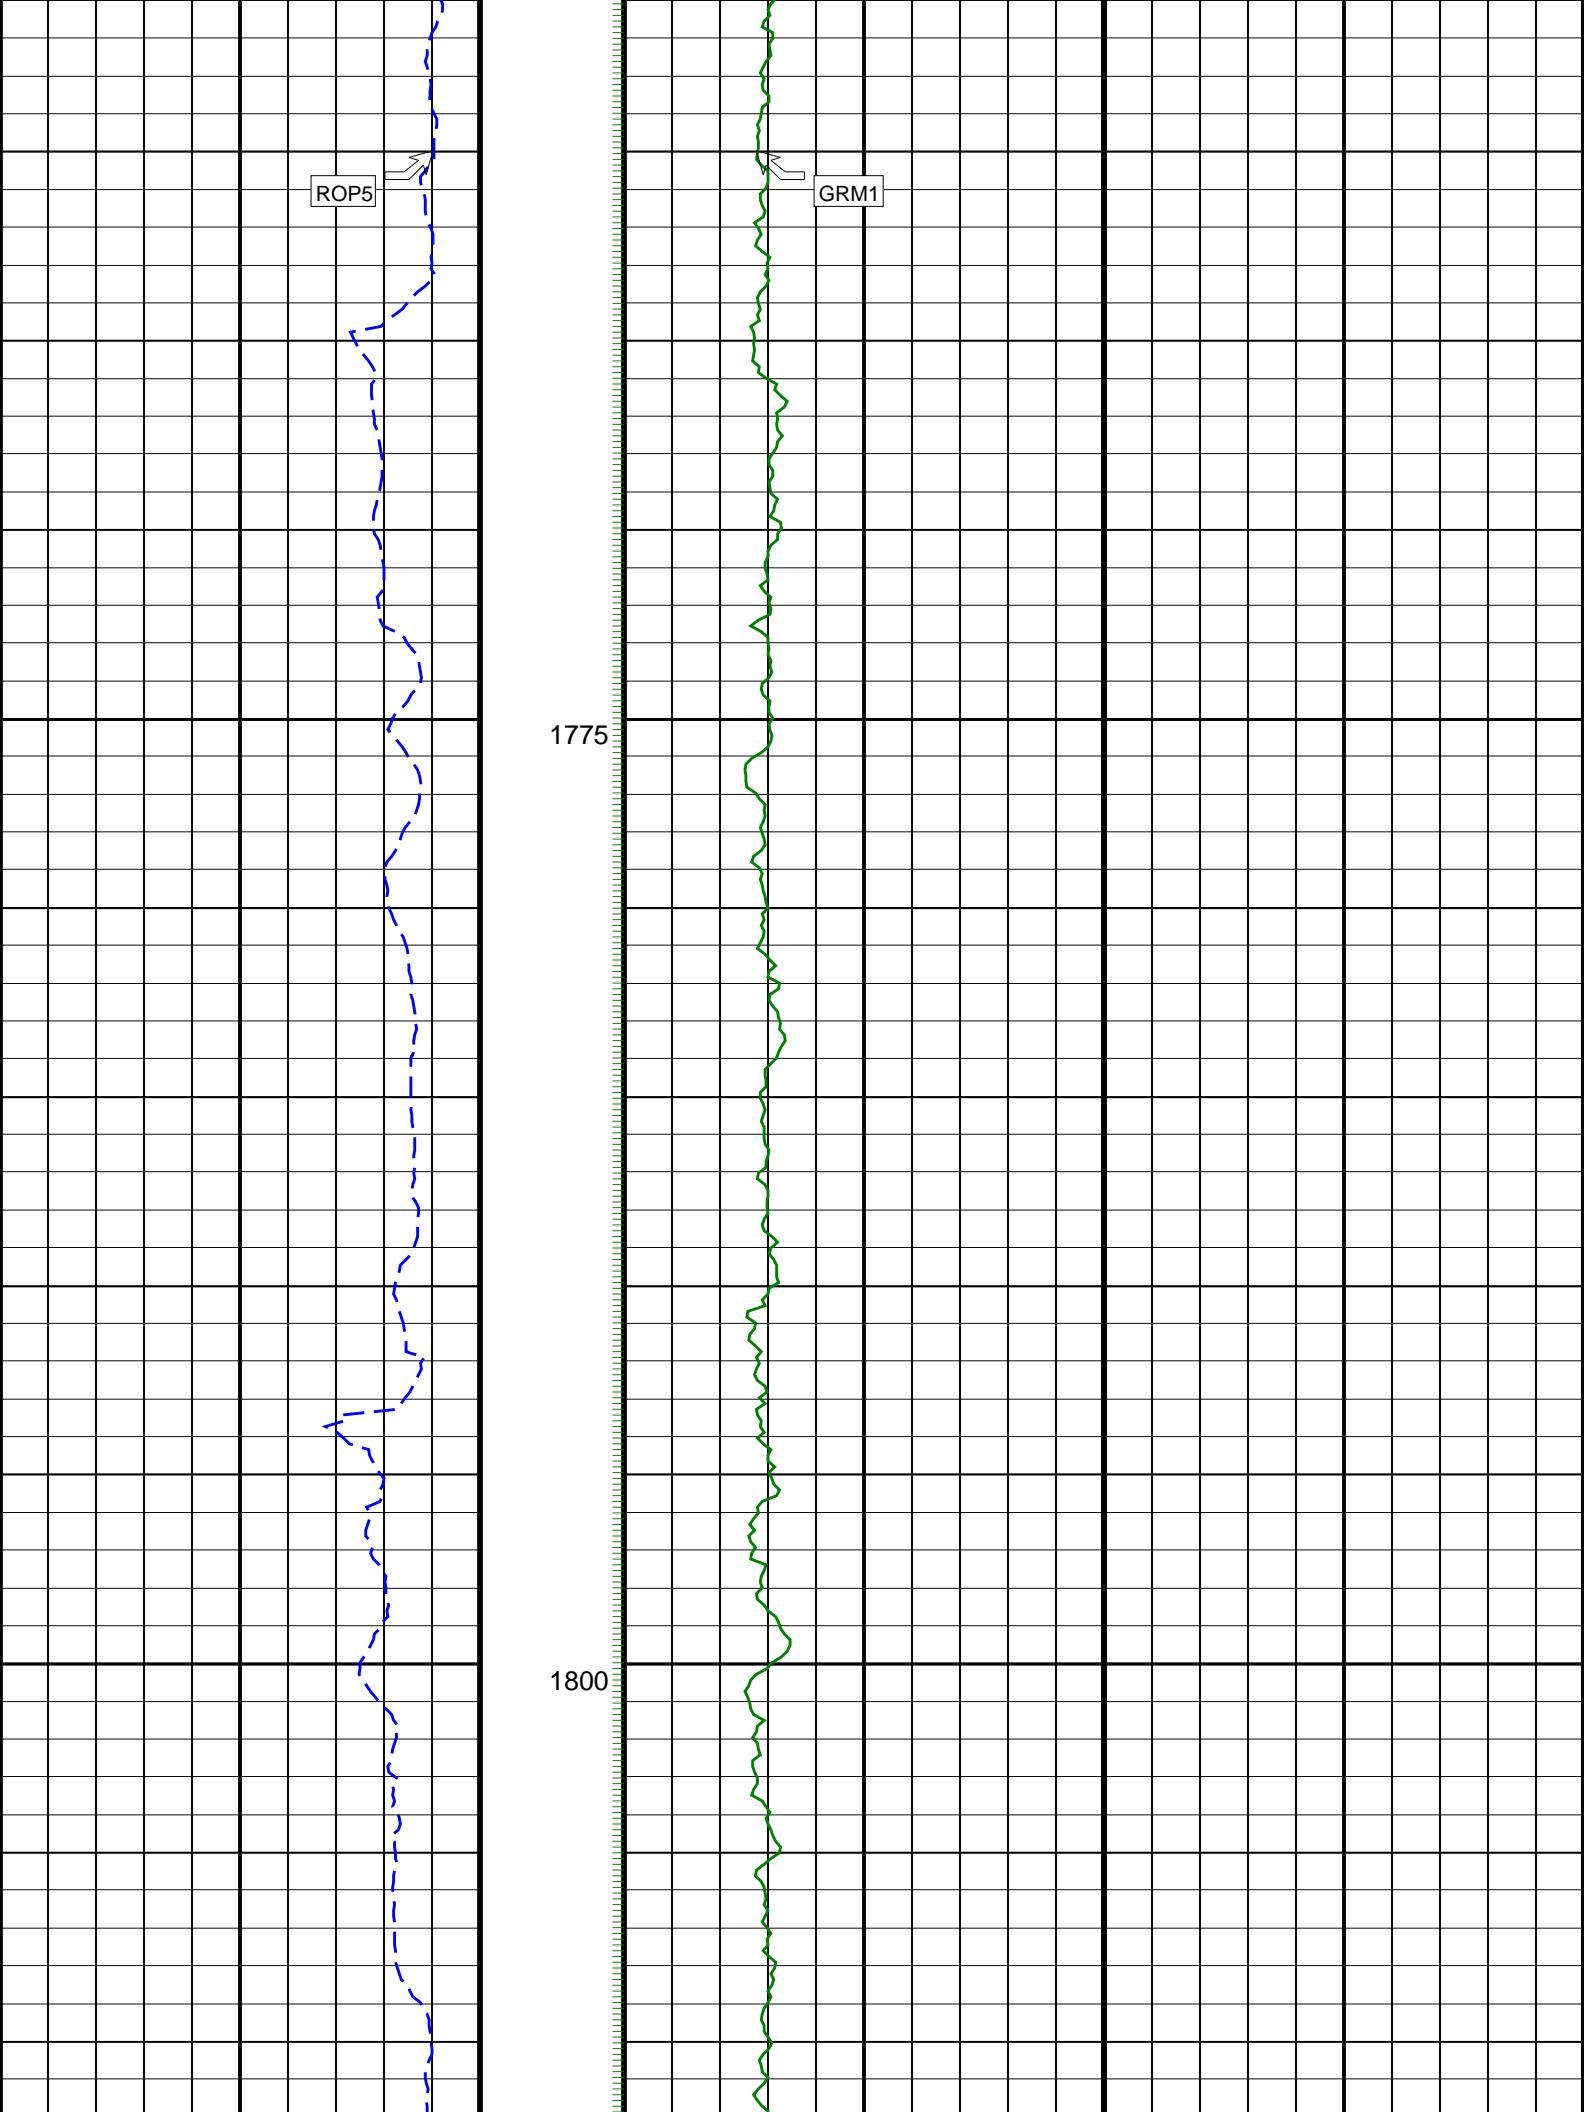

This panel shows a genomic track for the gene ROP5. The track consists of a vertical grid of black lines on a white background. A blue dashed line runs vertically through the center of the grid, indicating the position of the ROP5 gene. A small black box labeled "ROP5" is located in the upper left quadrant of the grid.

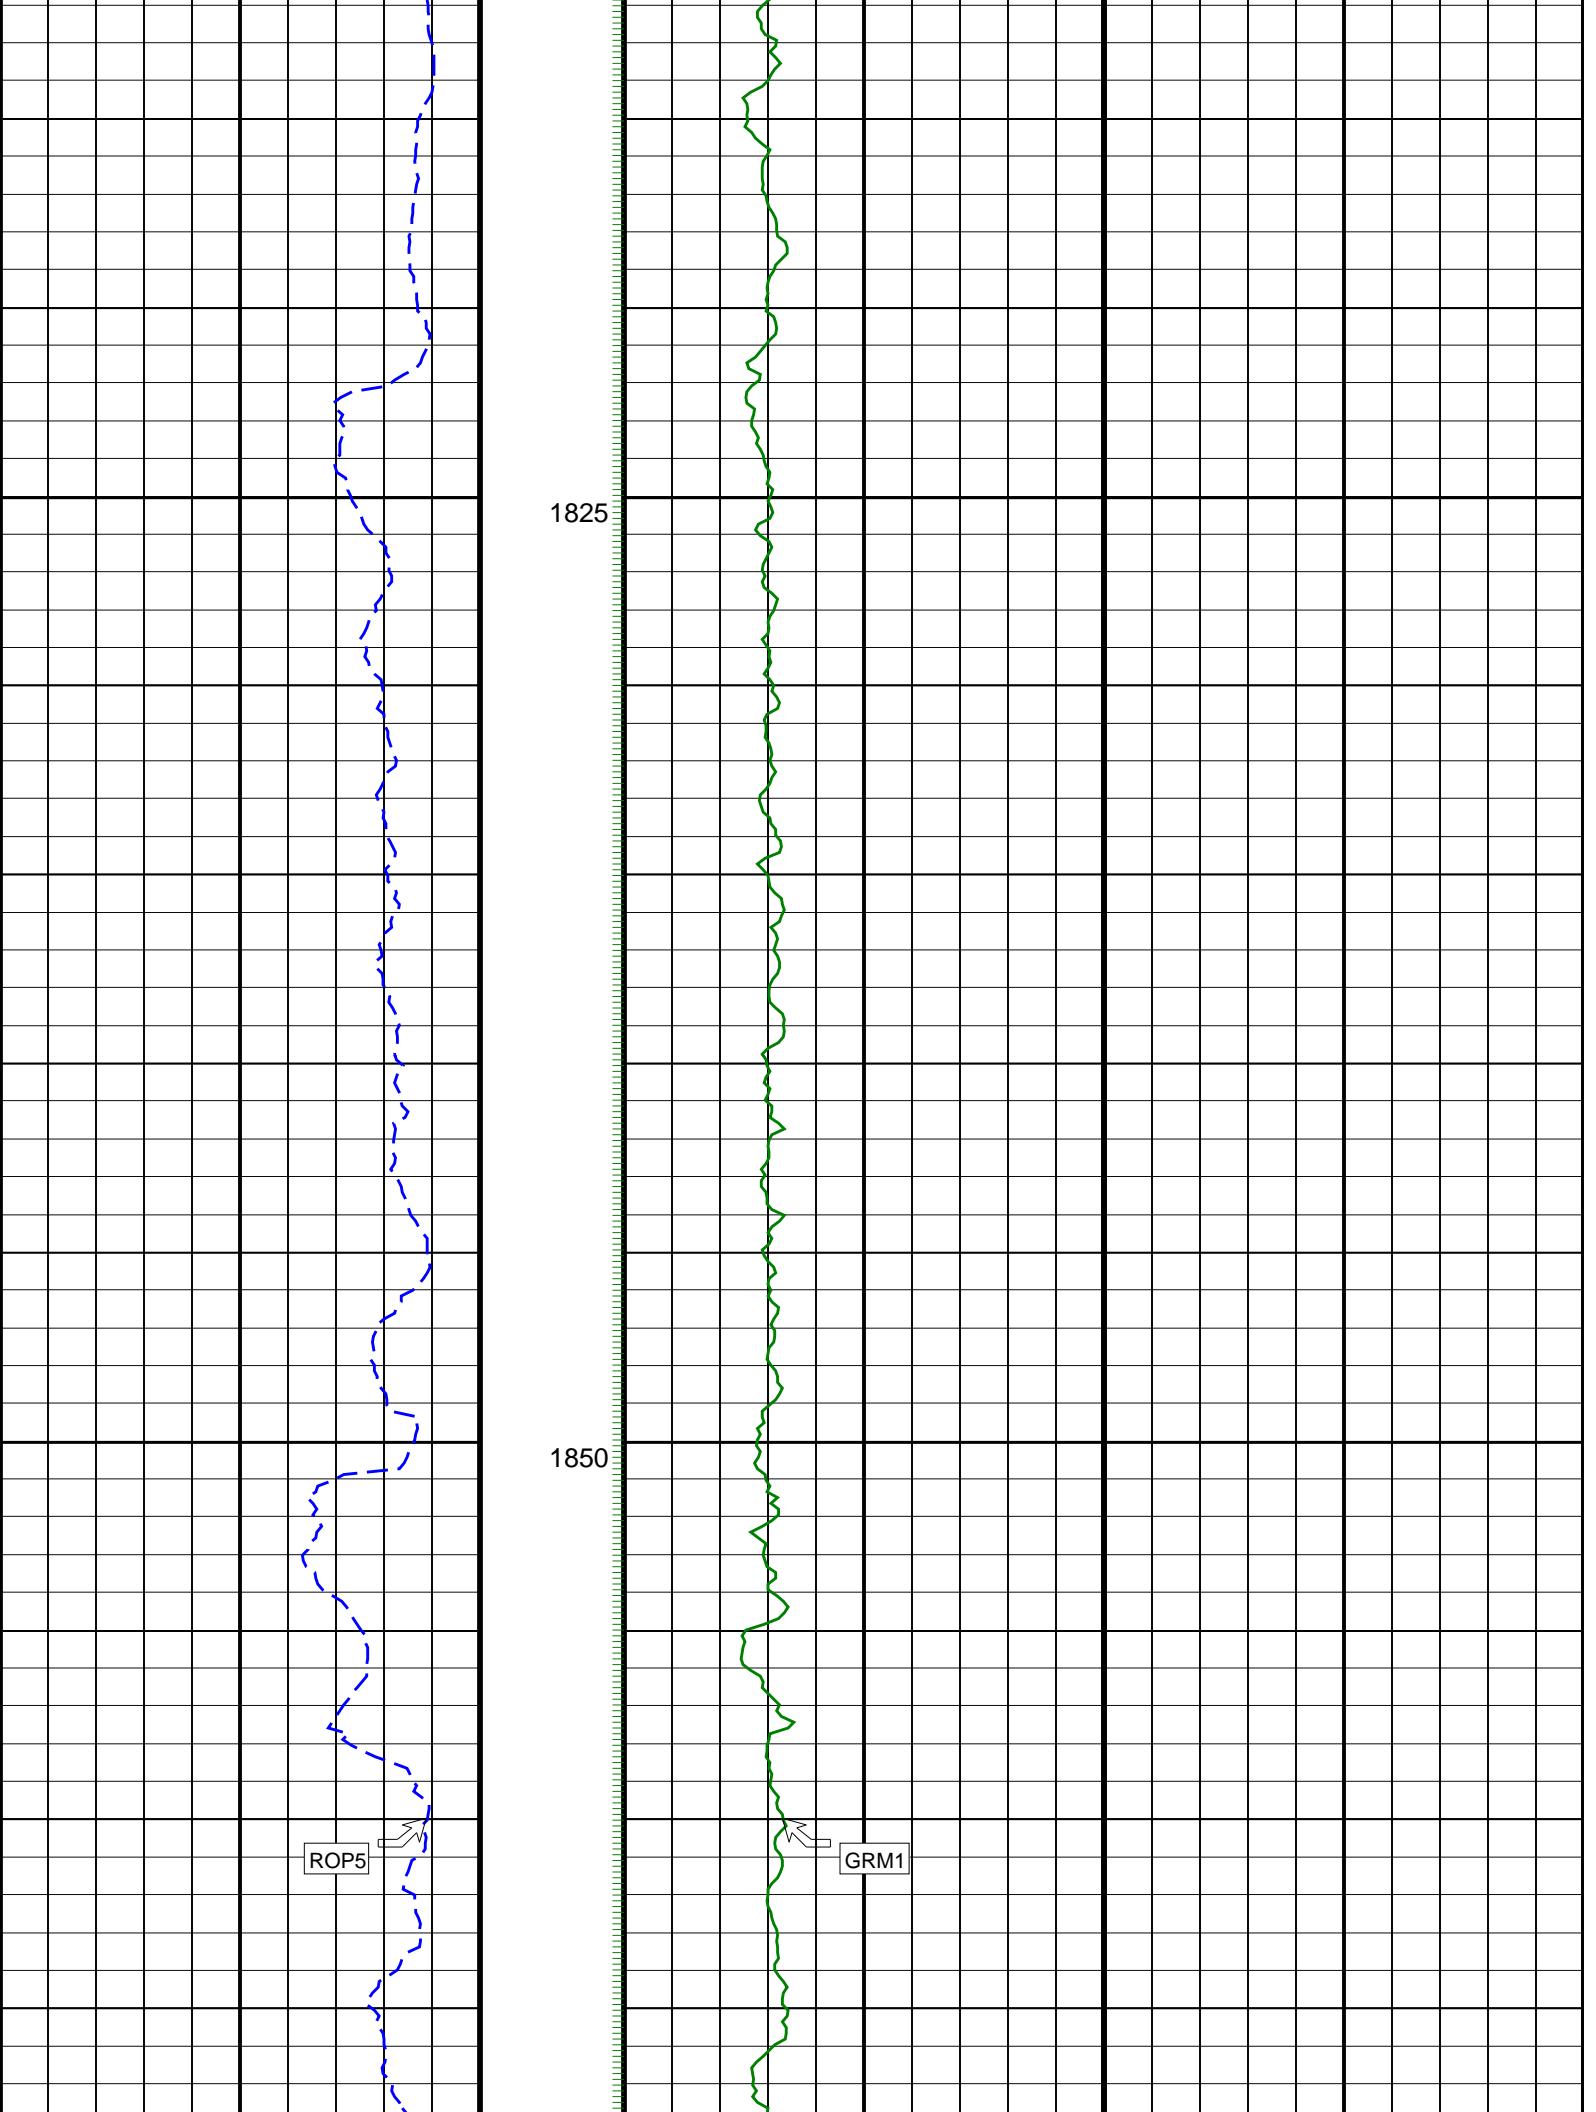

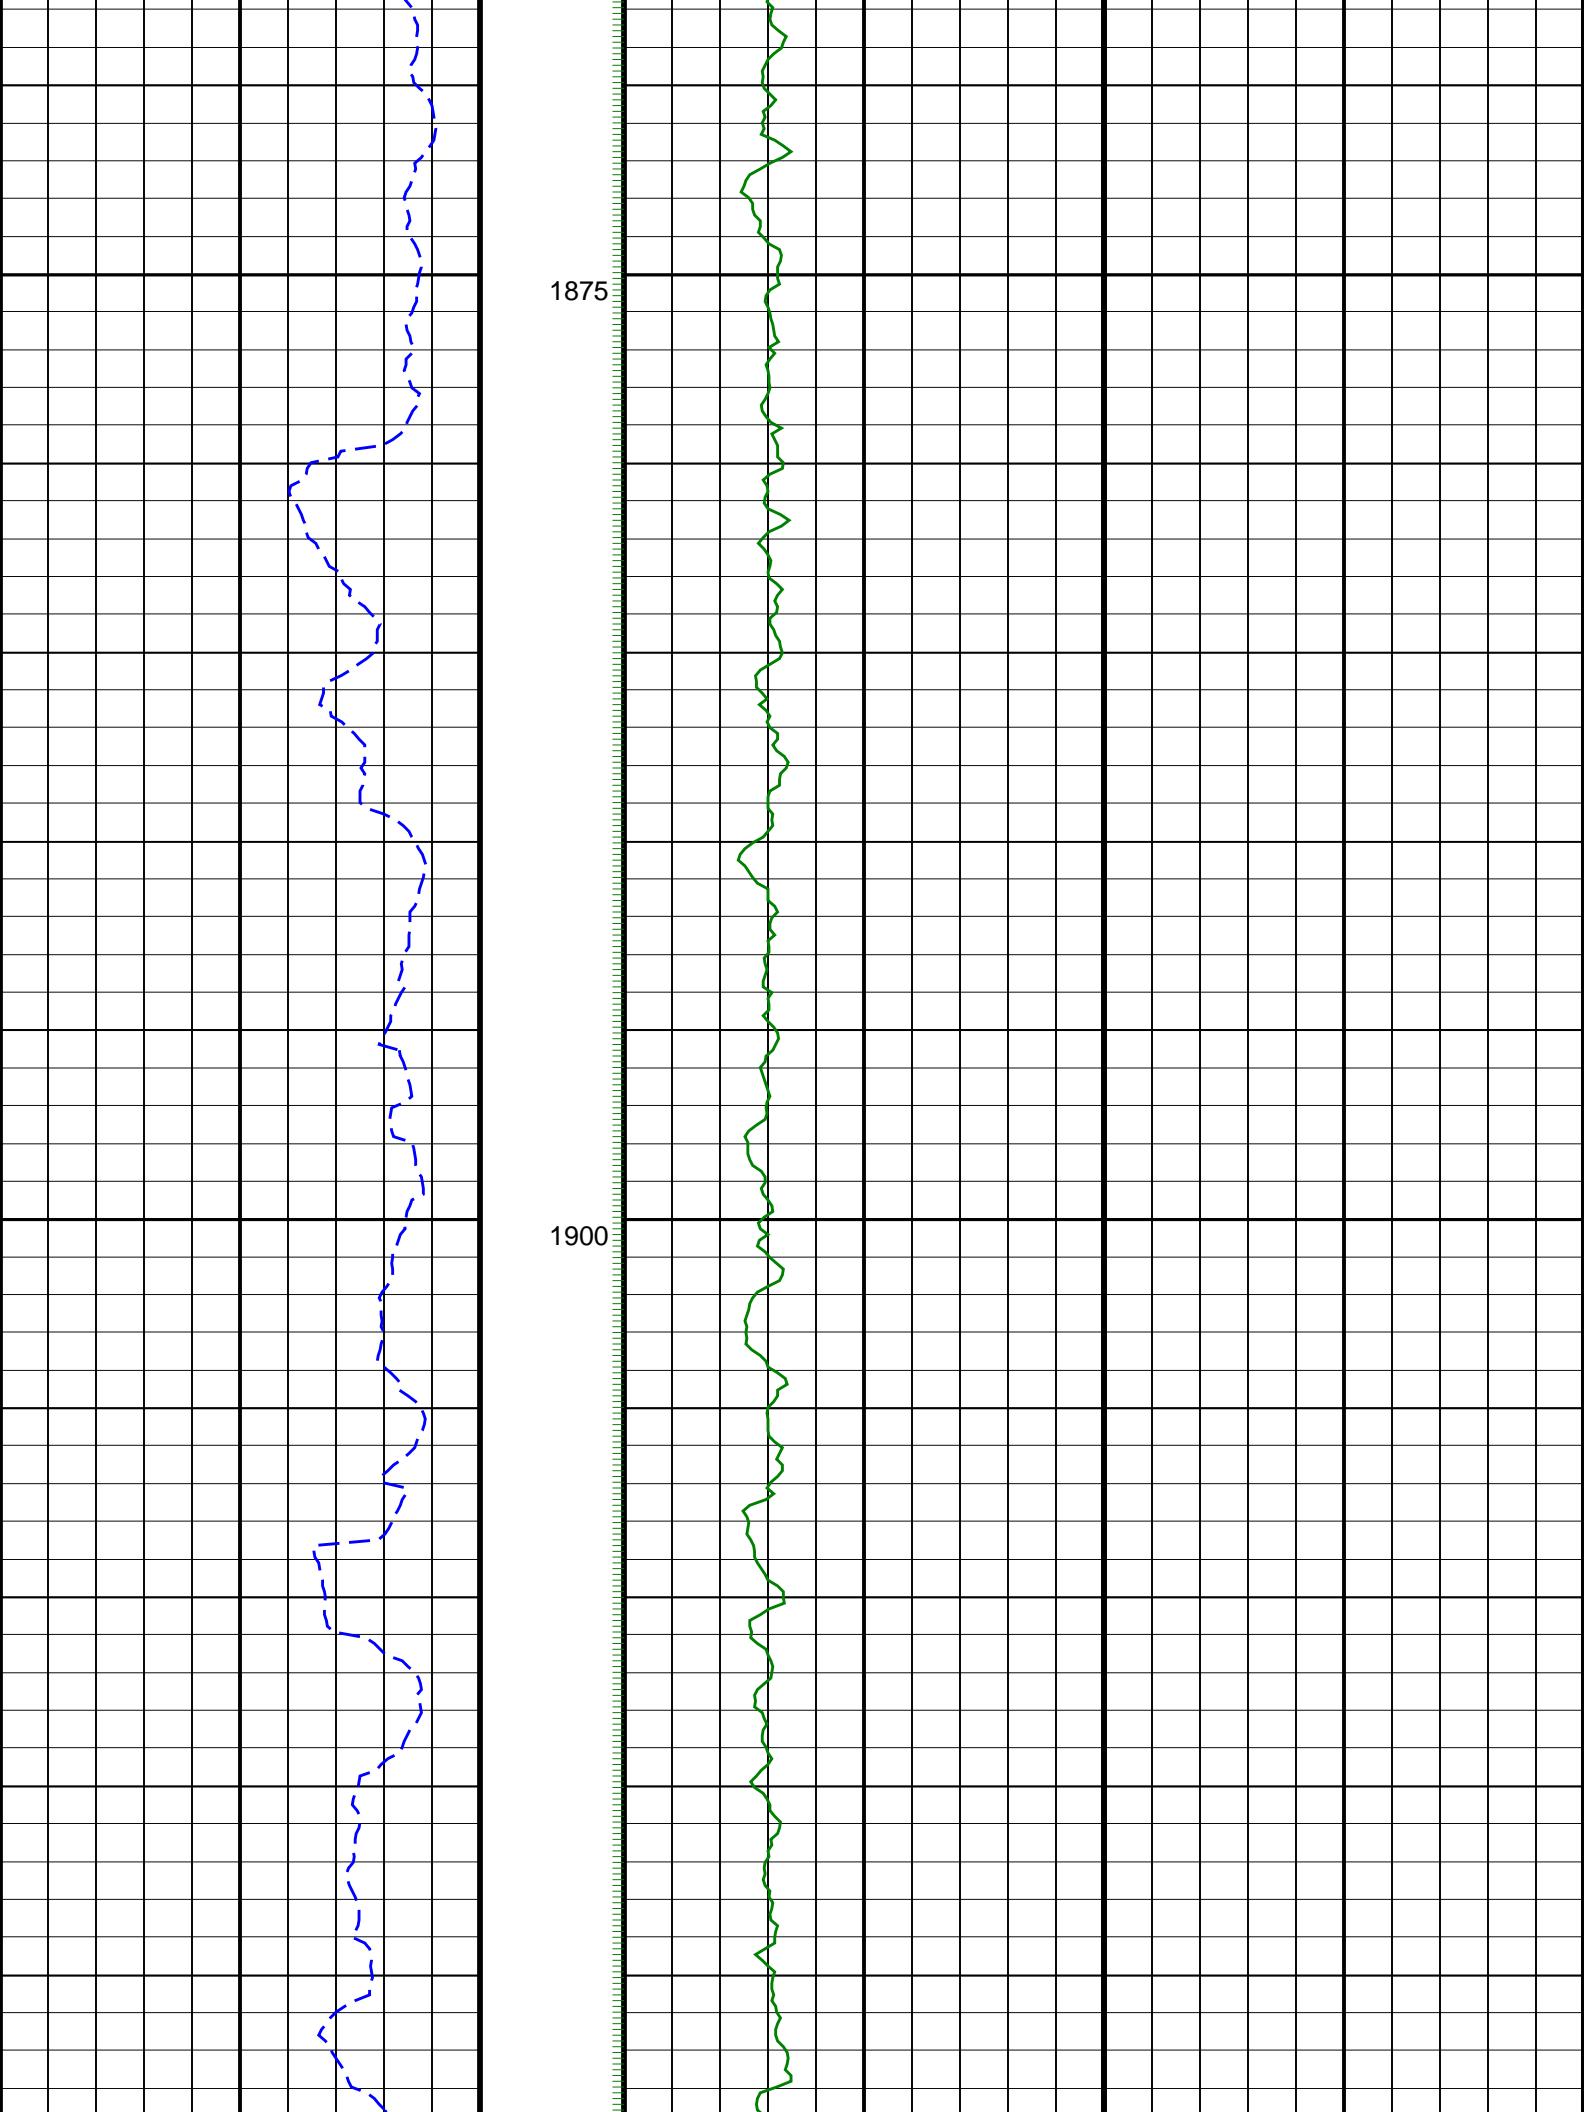

GRM1

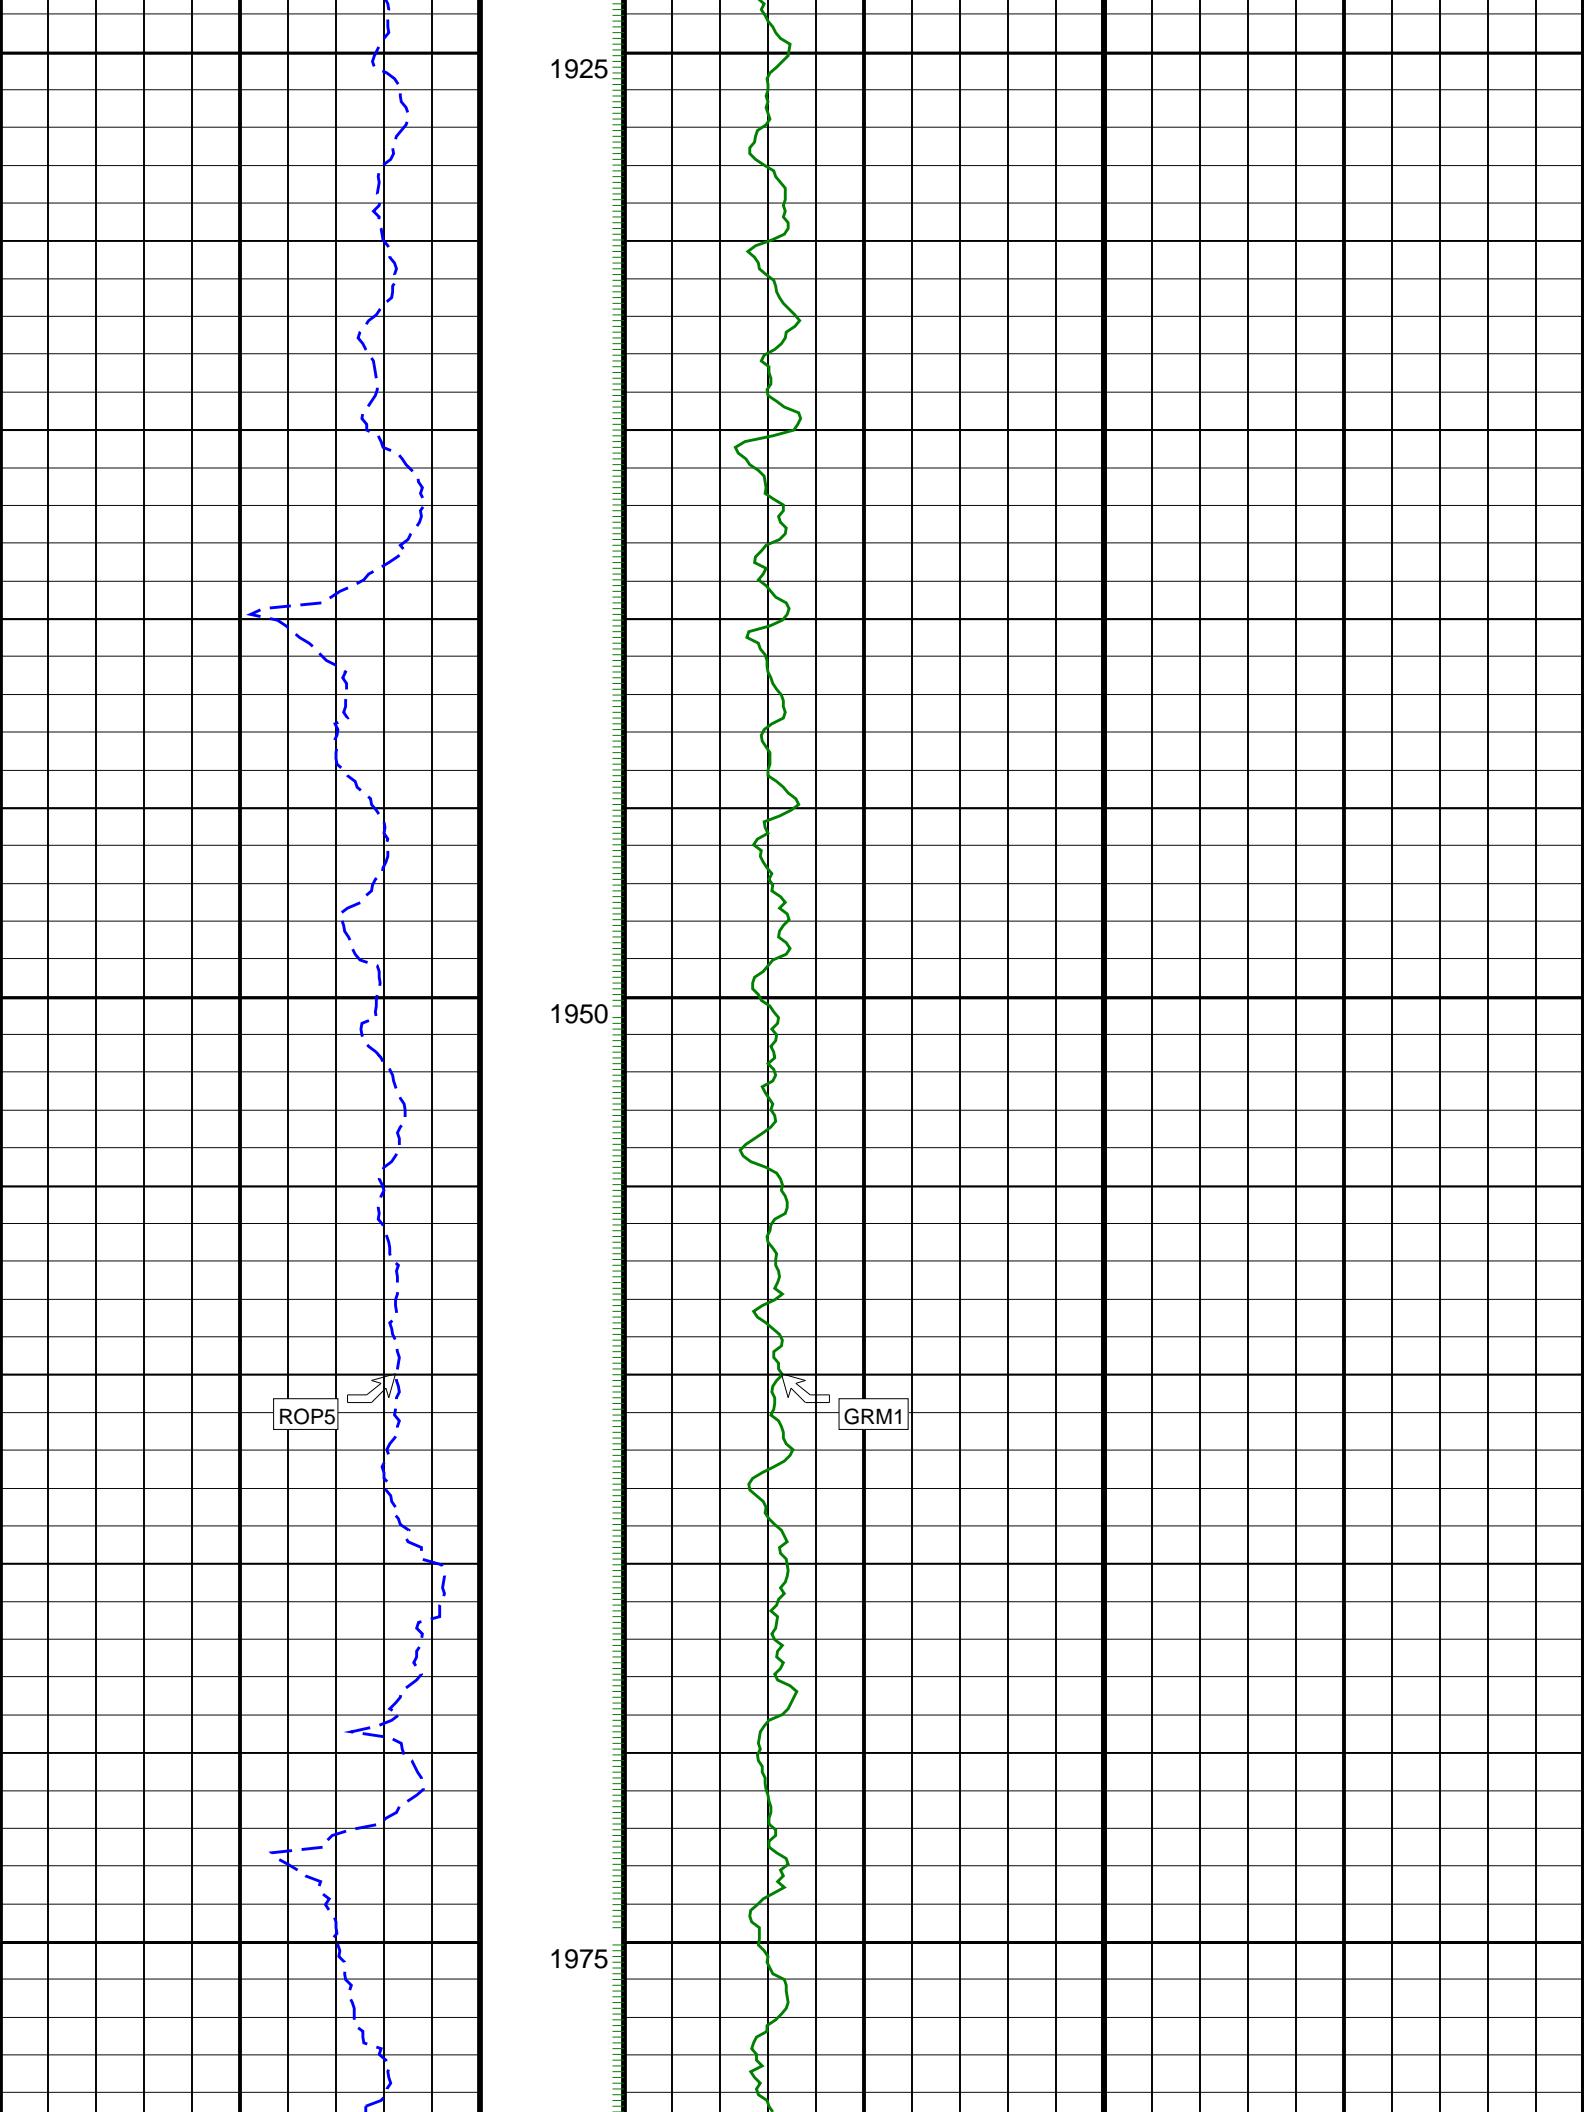

This panel shows a genomic track for the gene GRM1. The track consists of a vertical grid of black lines on a white background. A green wavy line runs vertically through the center of the grid, indicating the position of the GRM1 gene. A small black box labeled "GRM1" is located in the upper right quadrant of the grid. The numbers "1650" and "1675" are positioned at the top and bottom of the grid respectively.

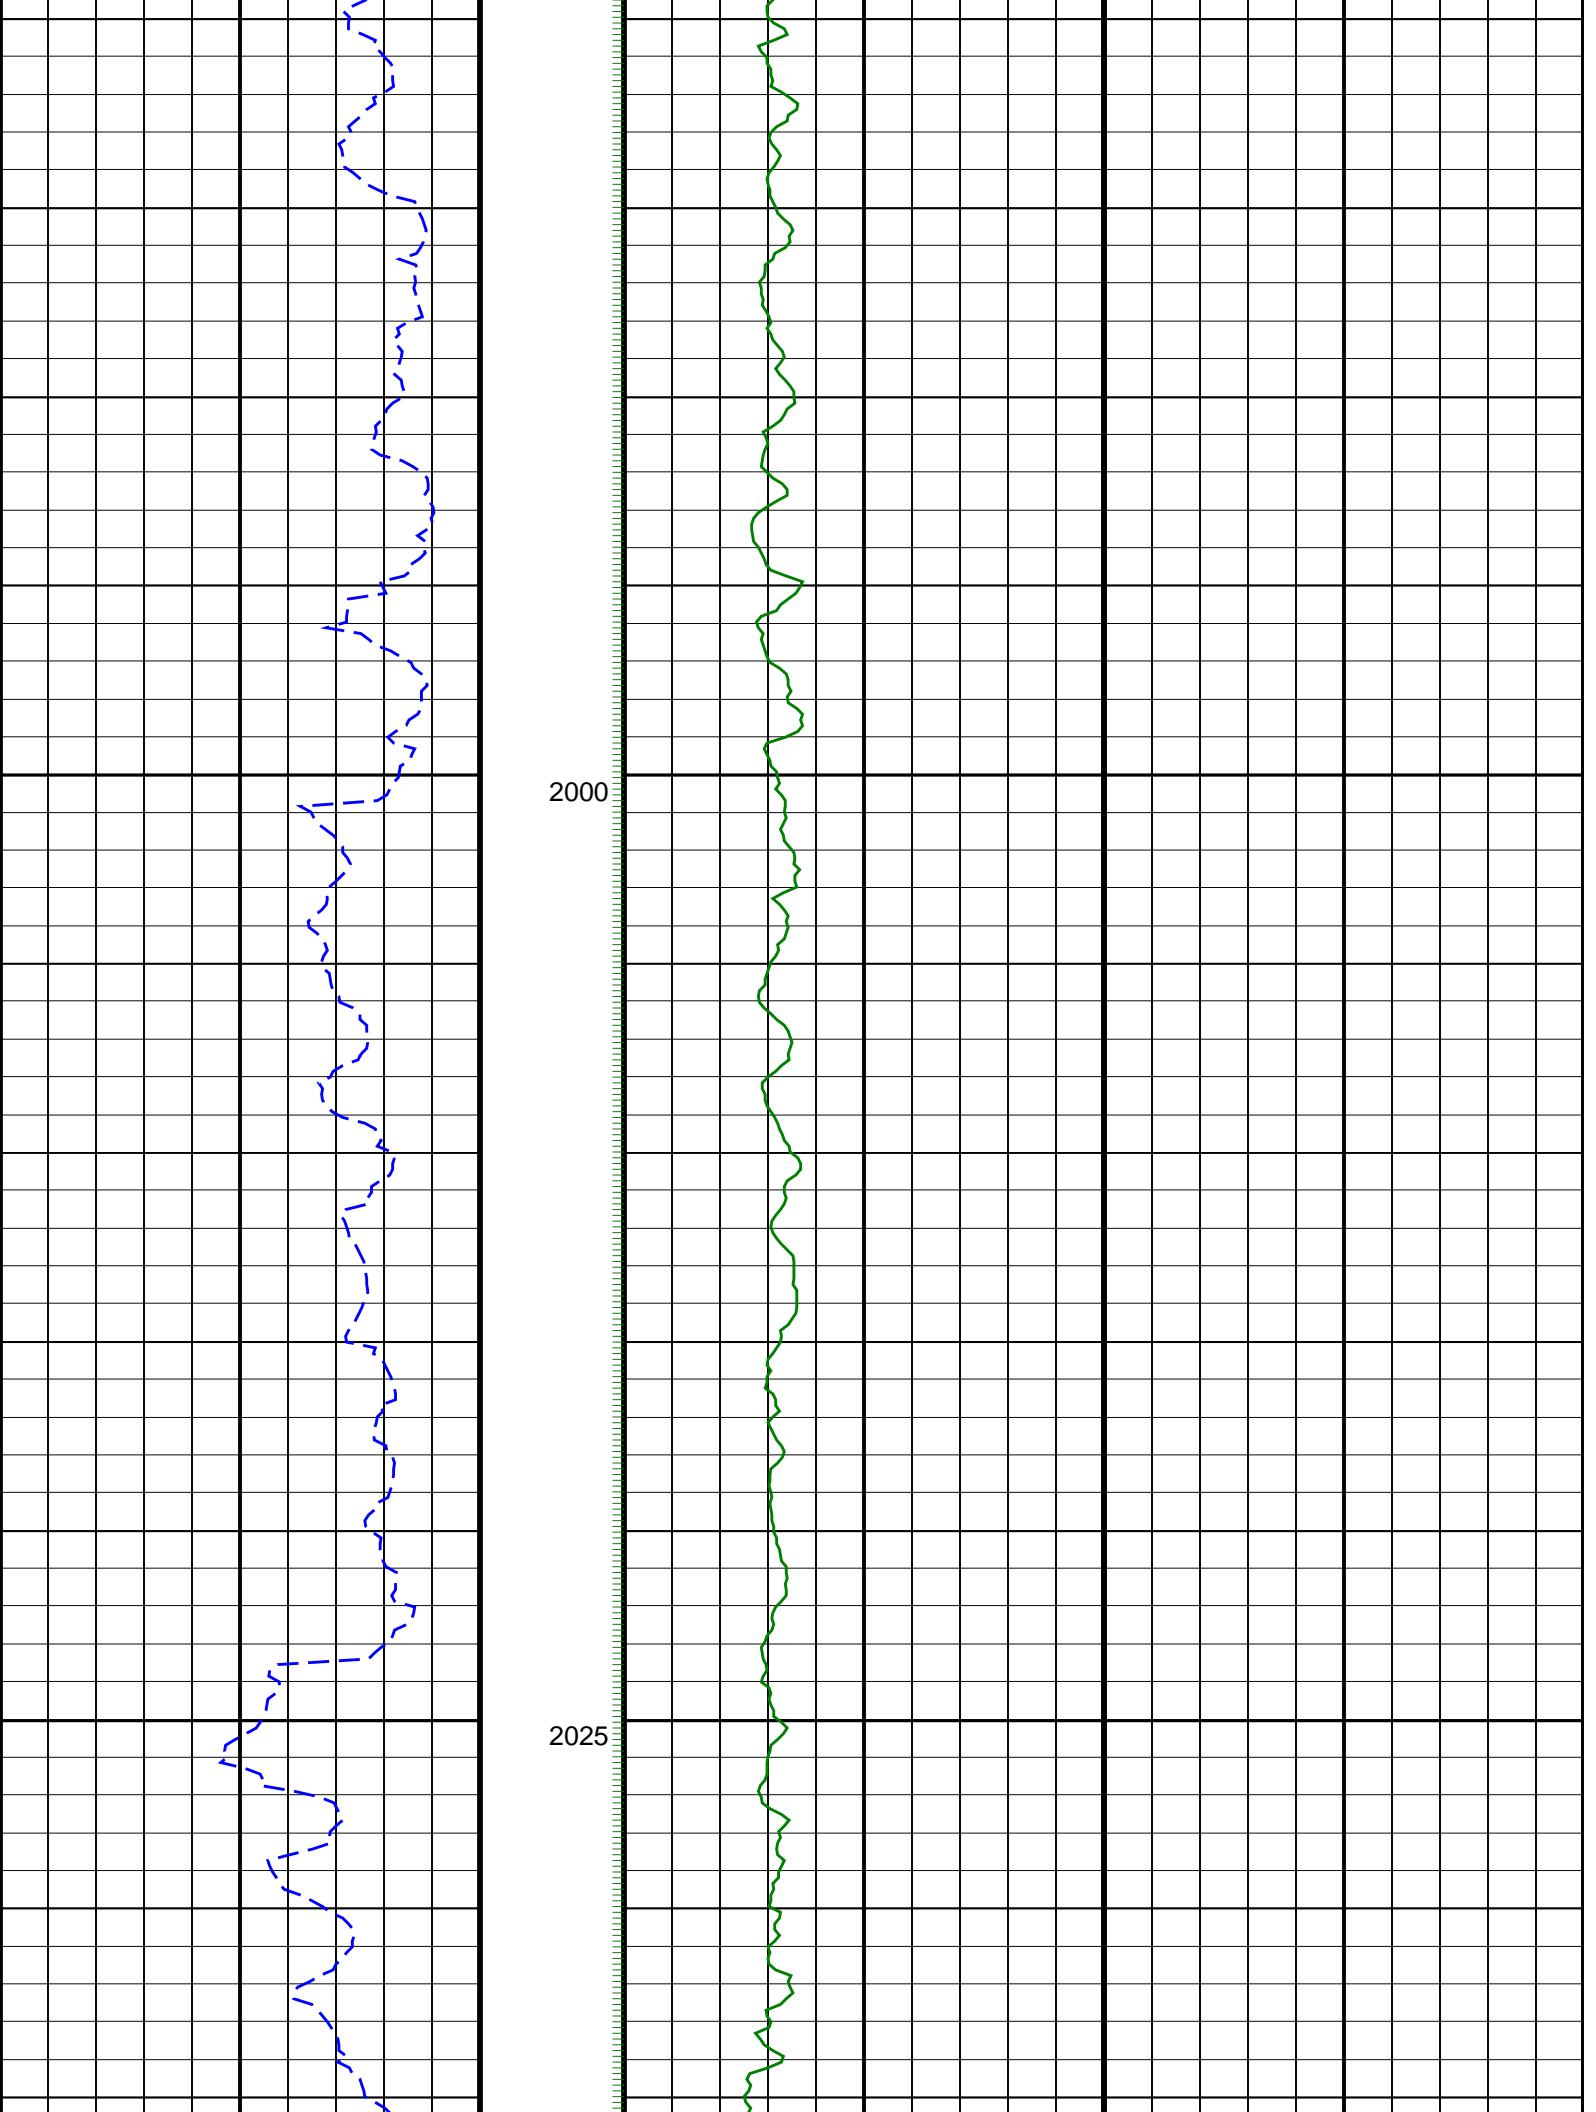

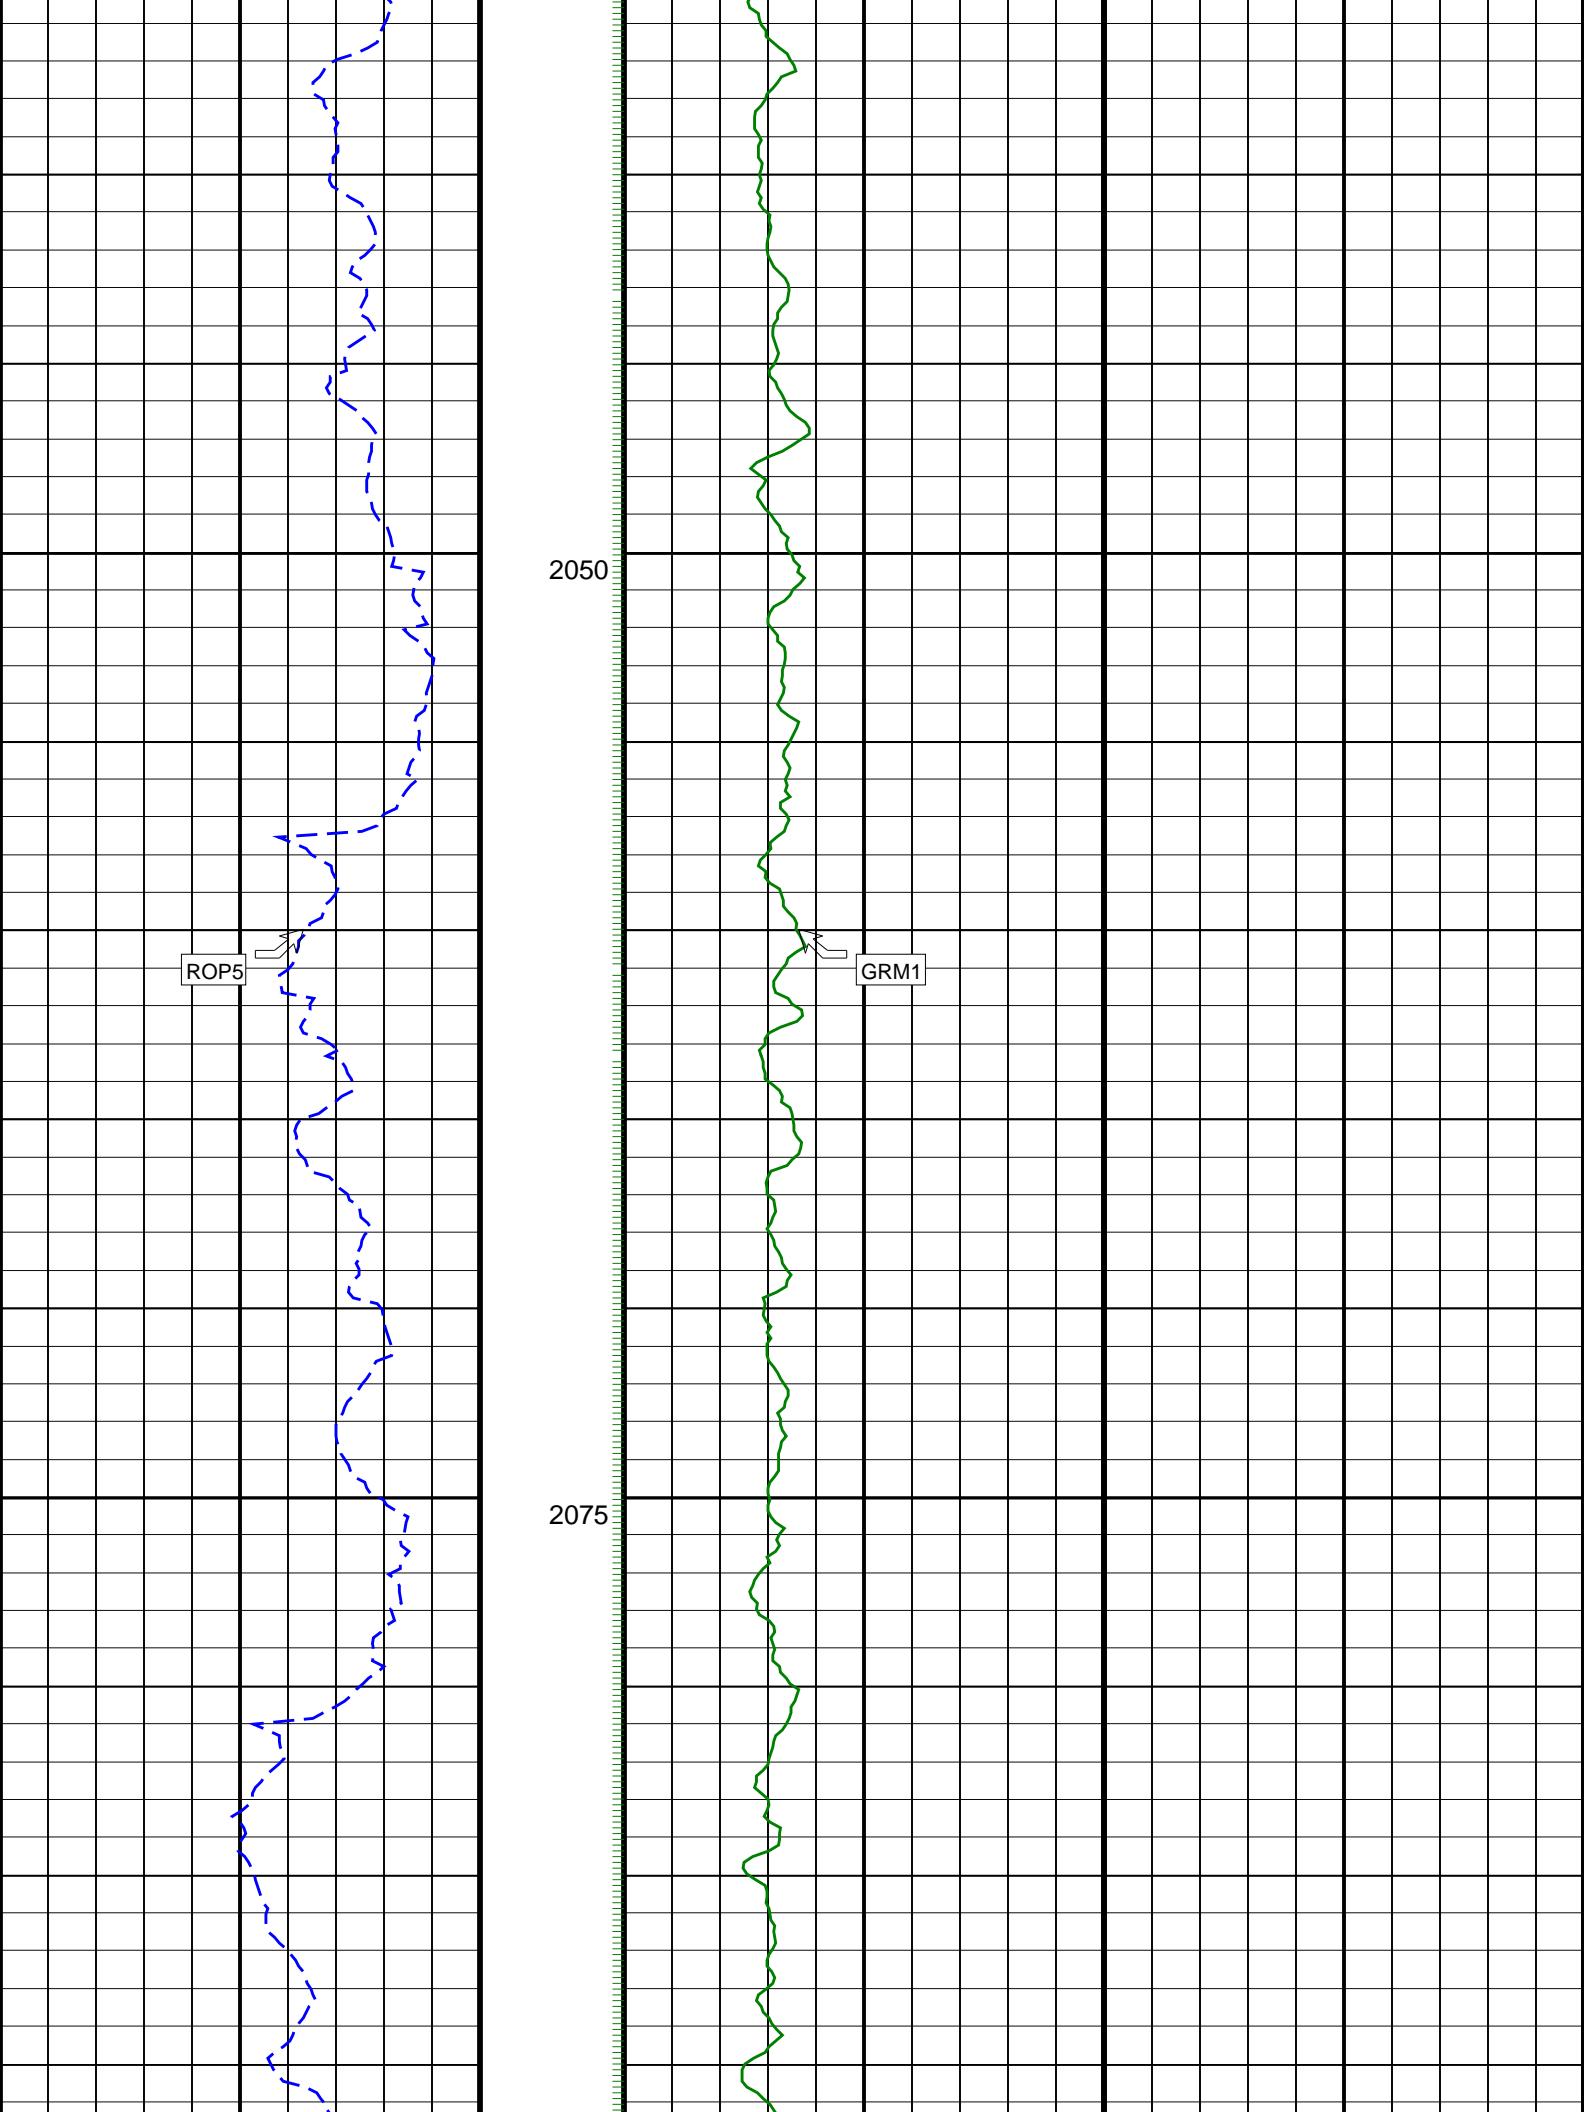

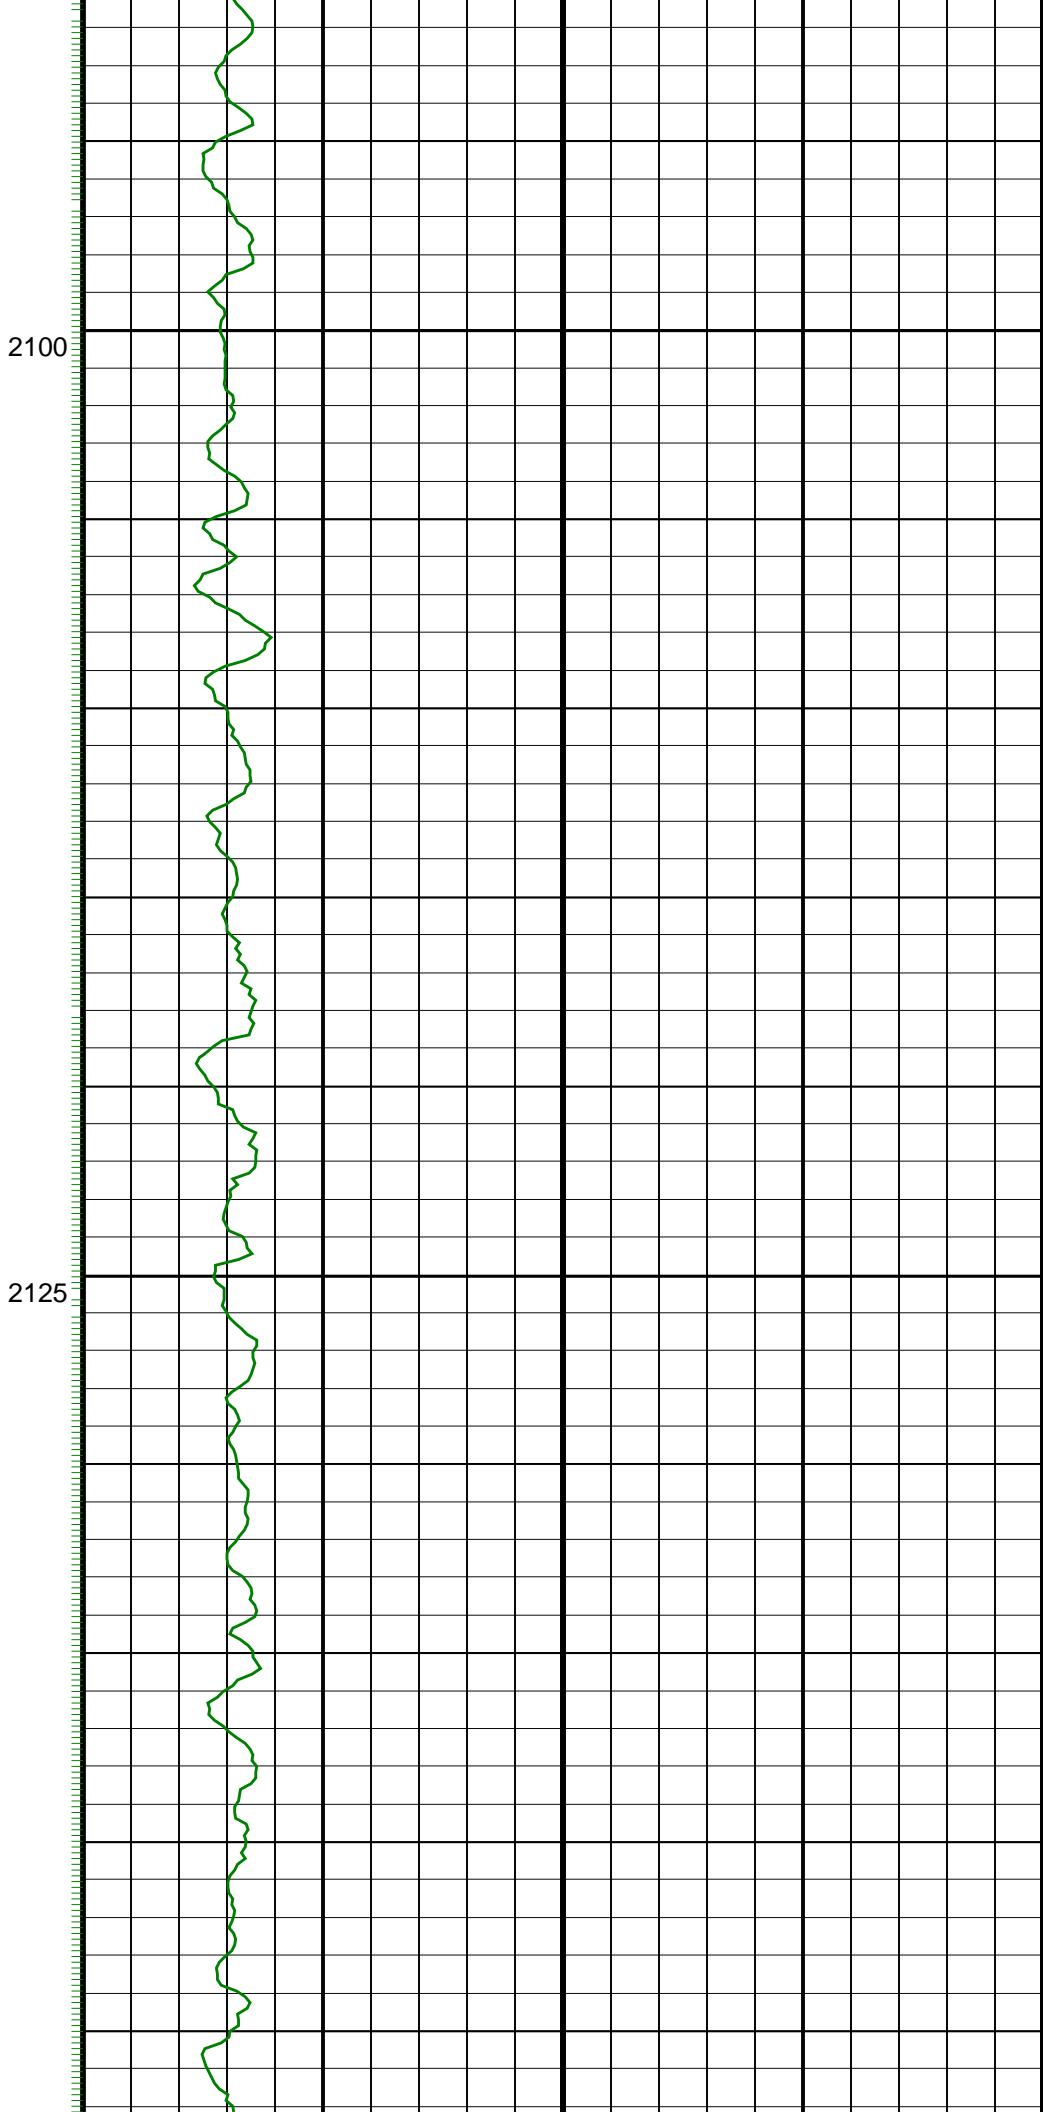

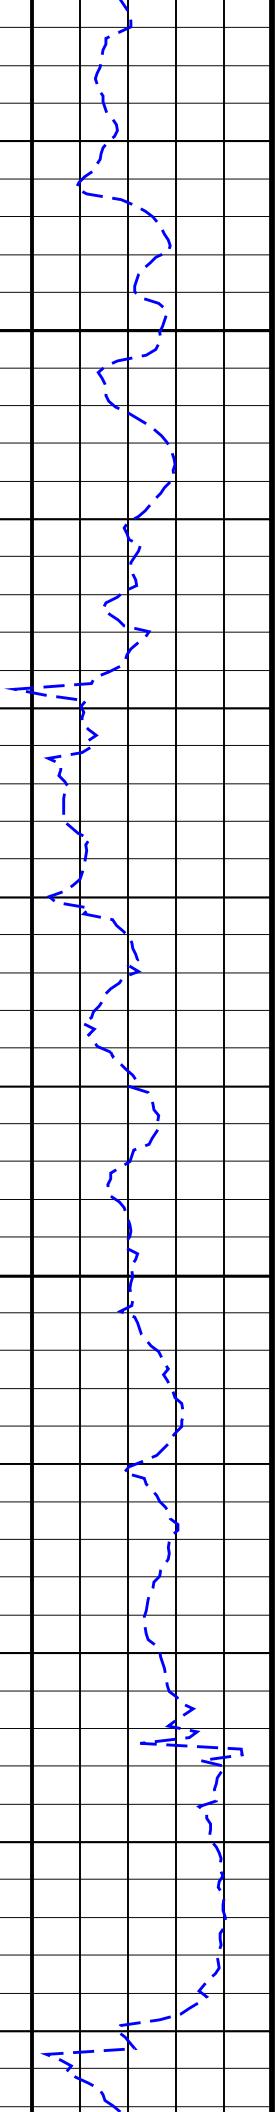

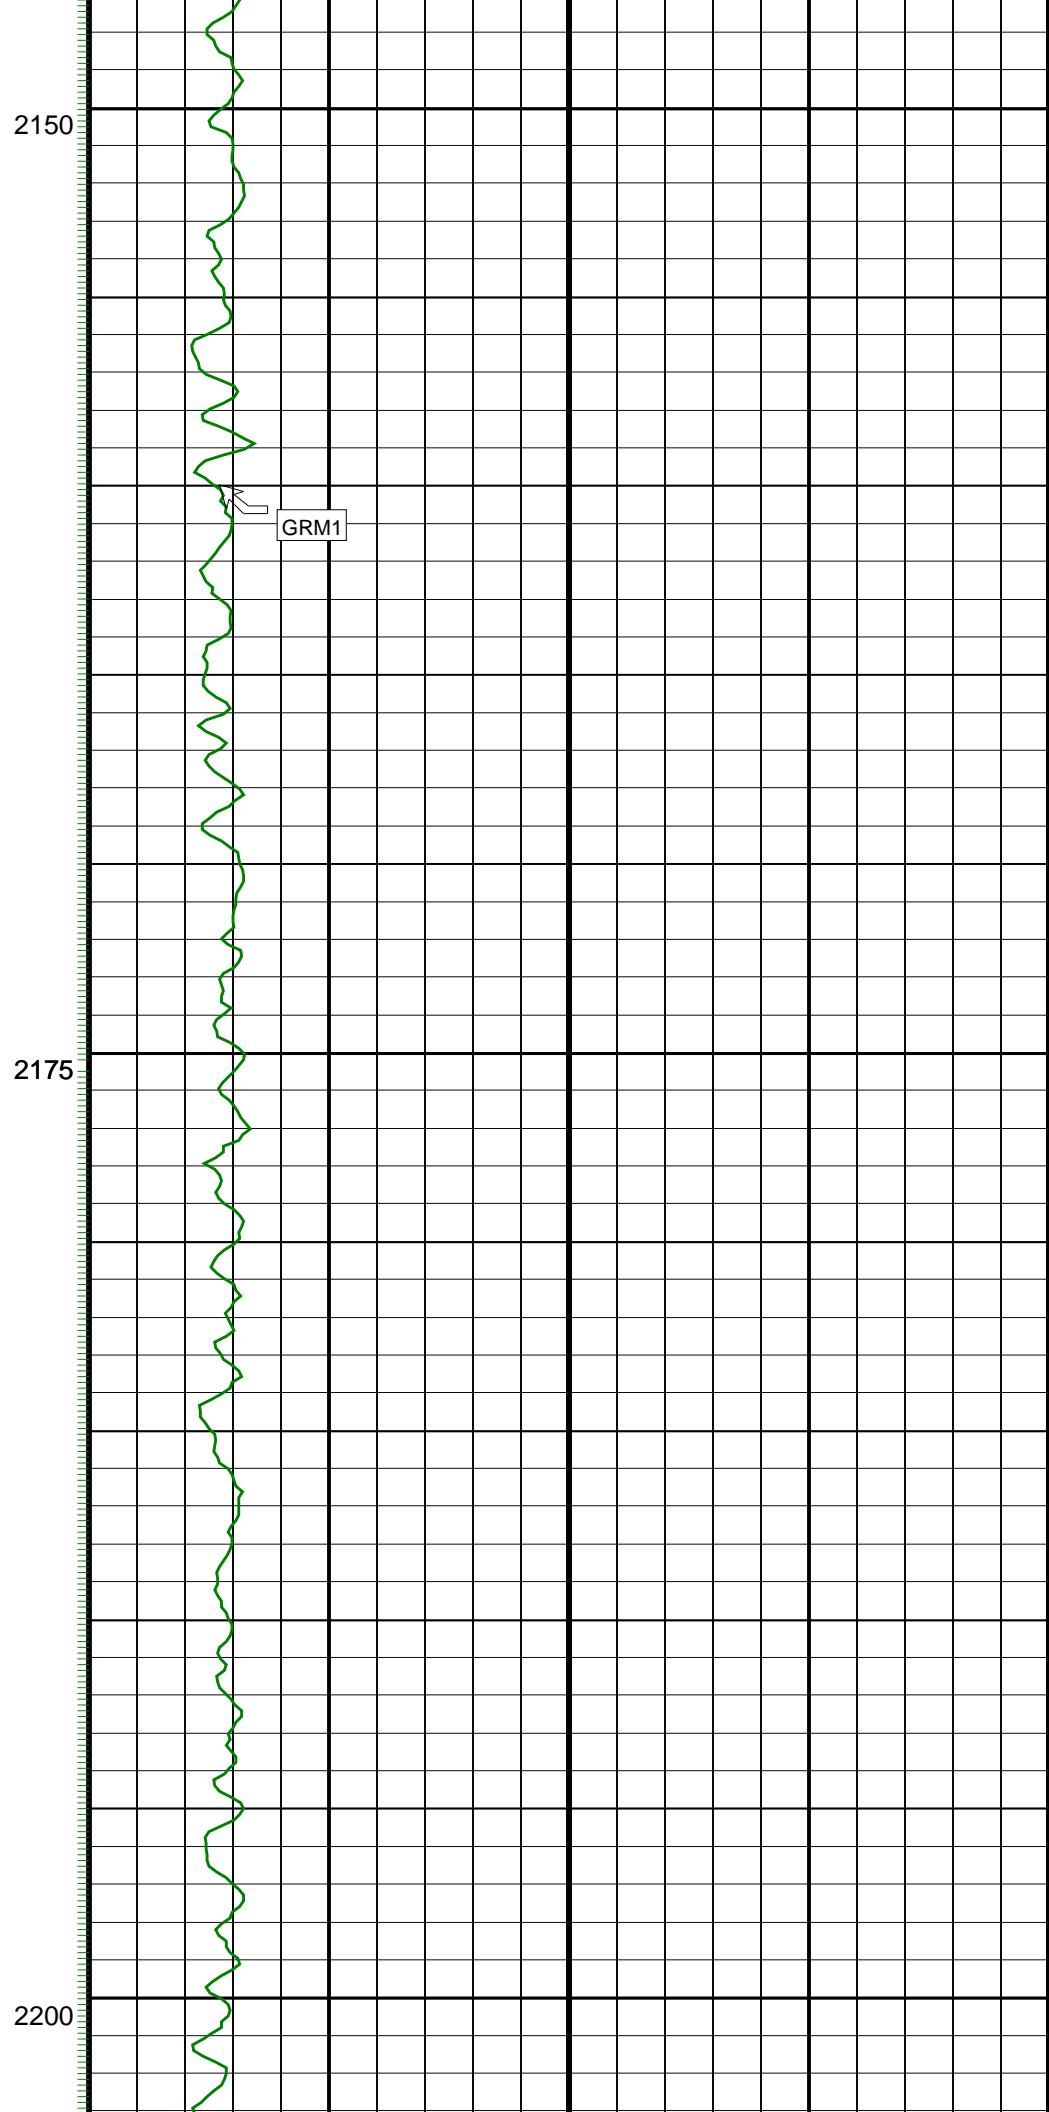

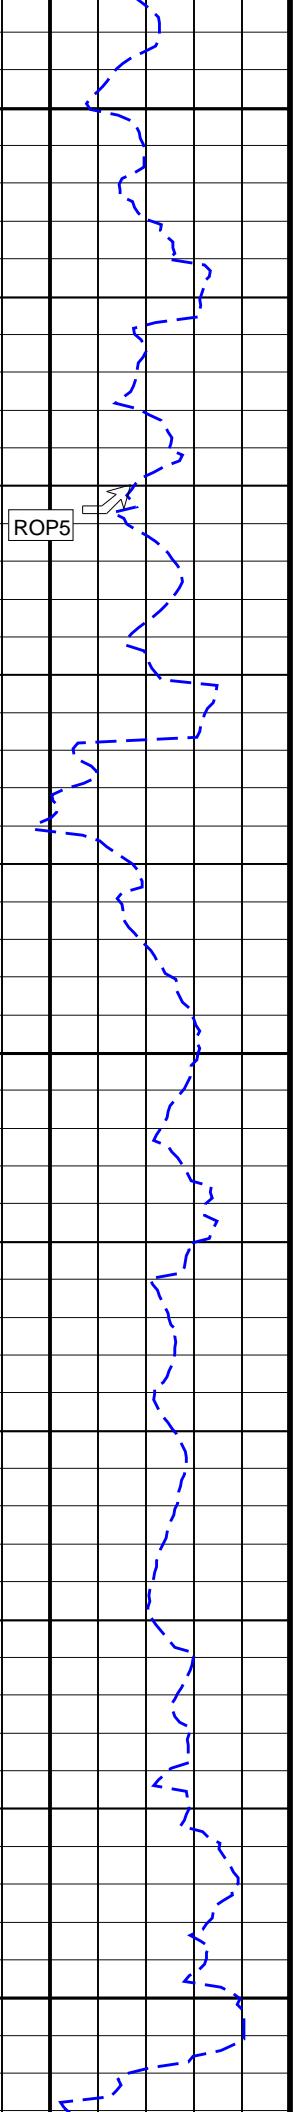

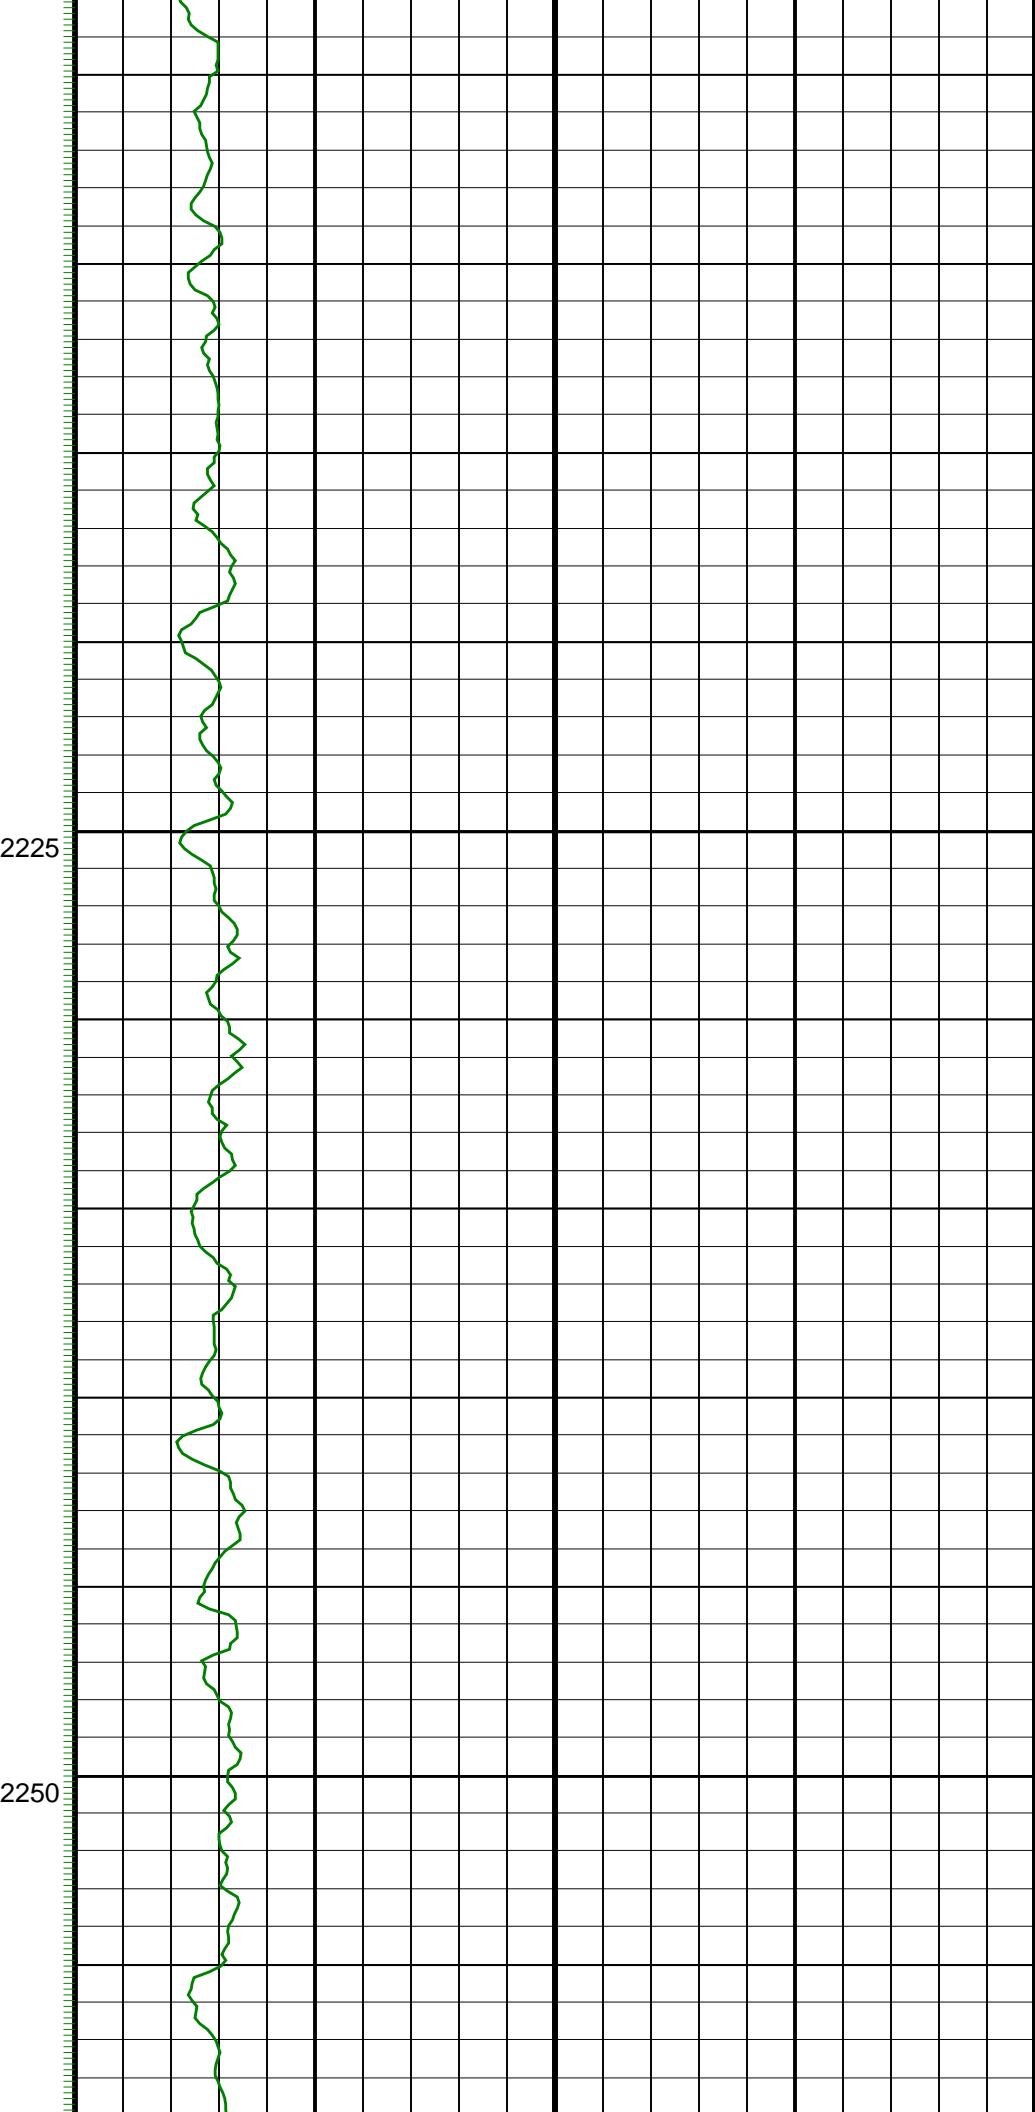

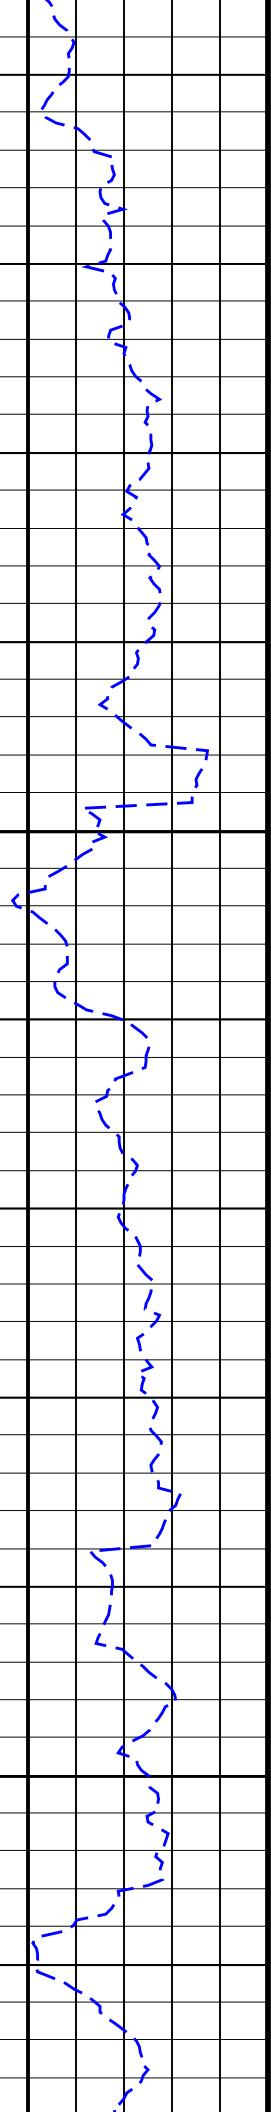

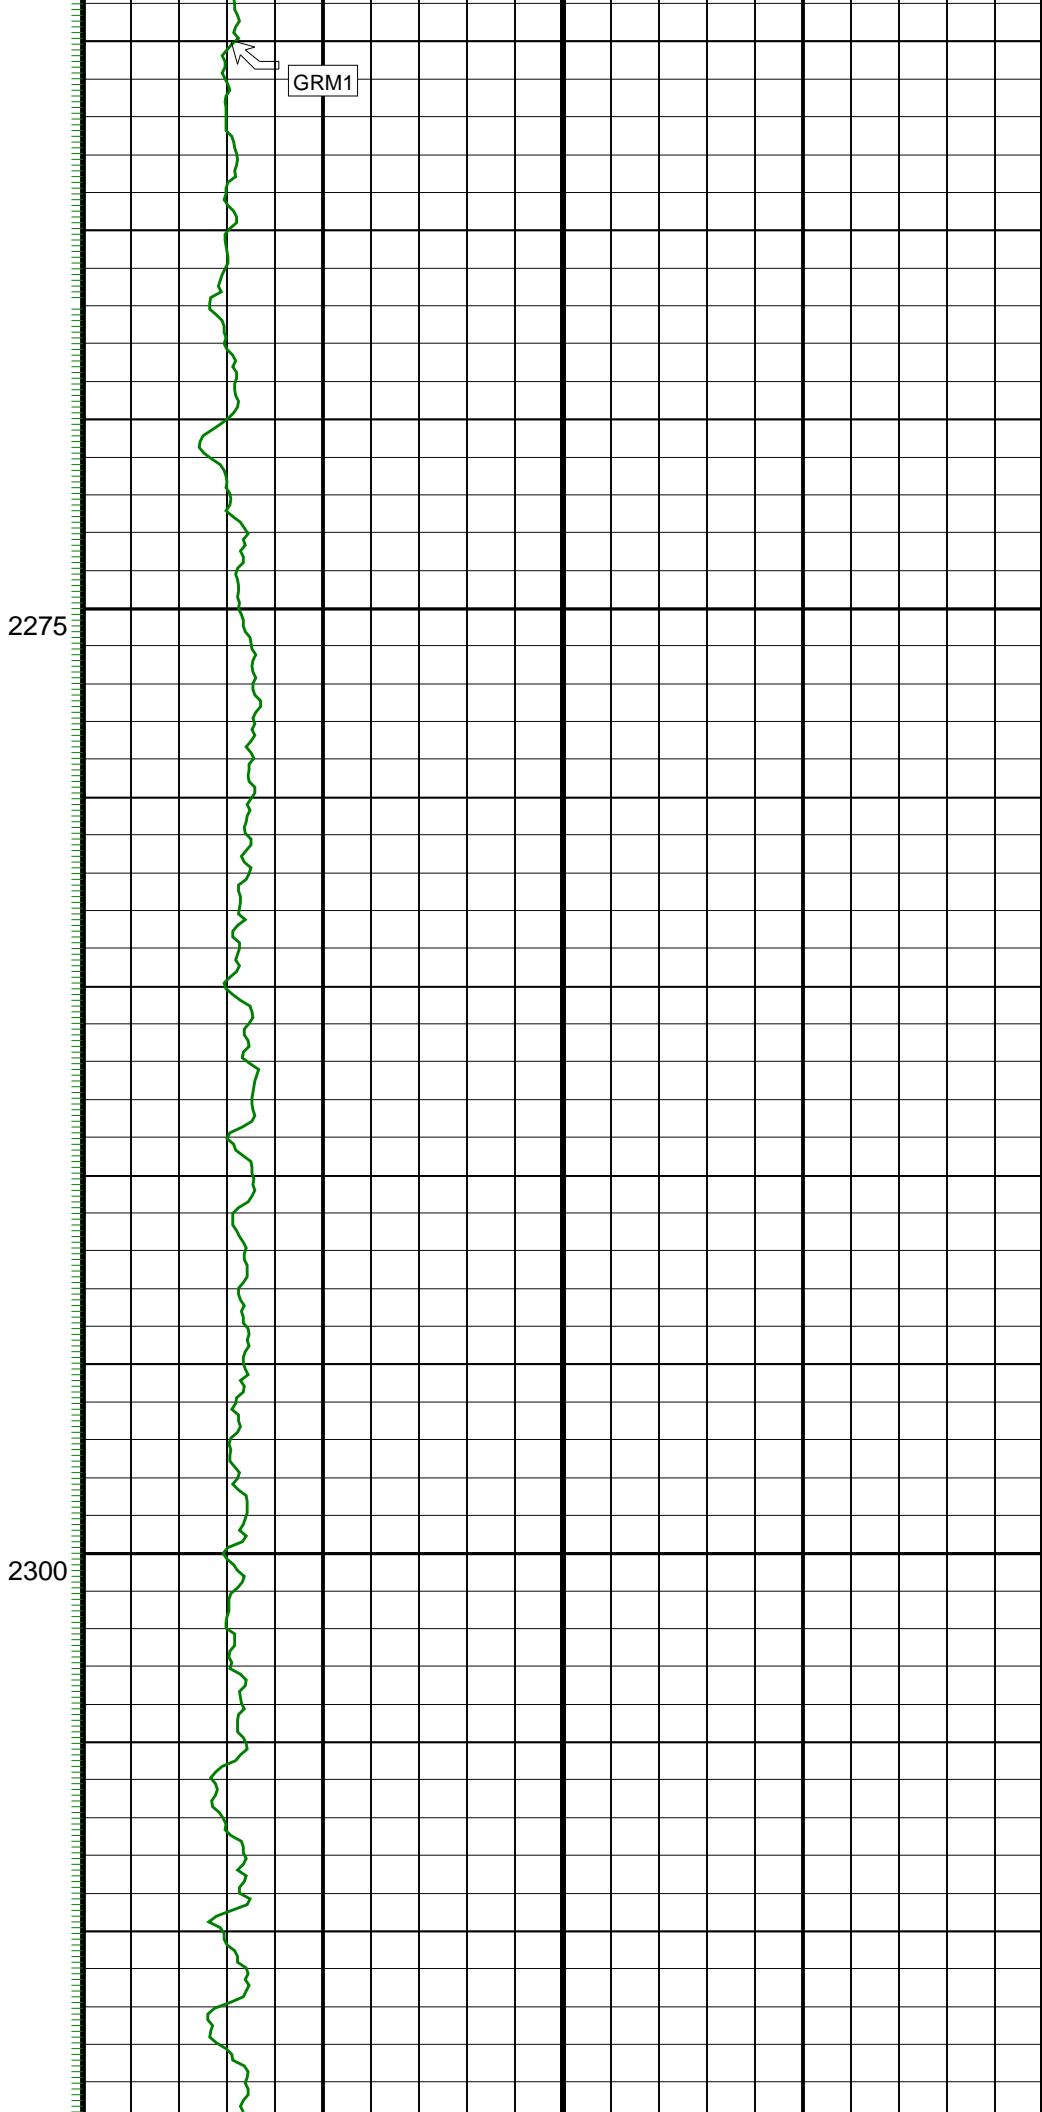

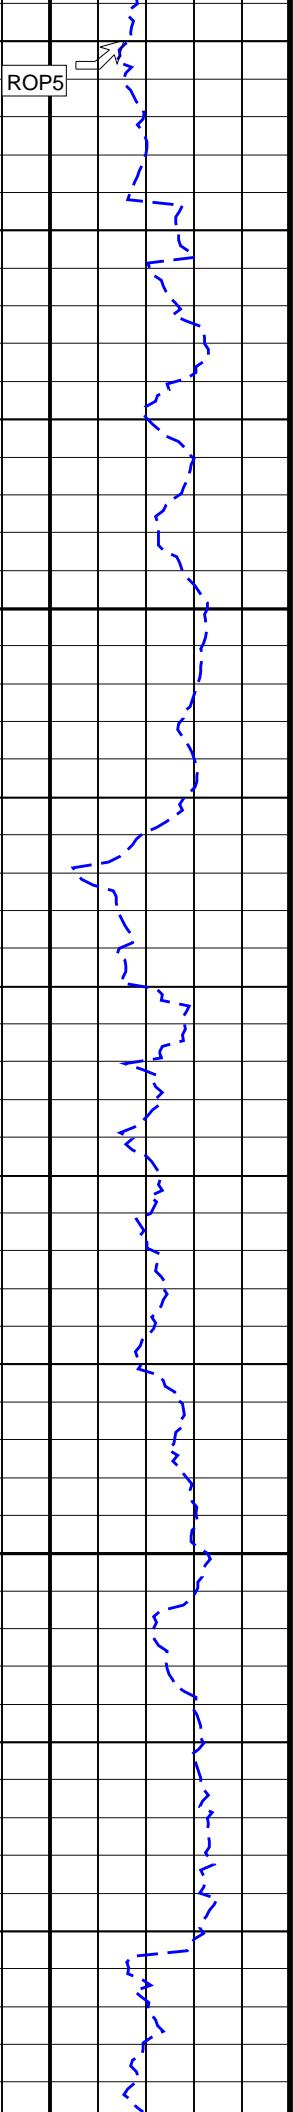

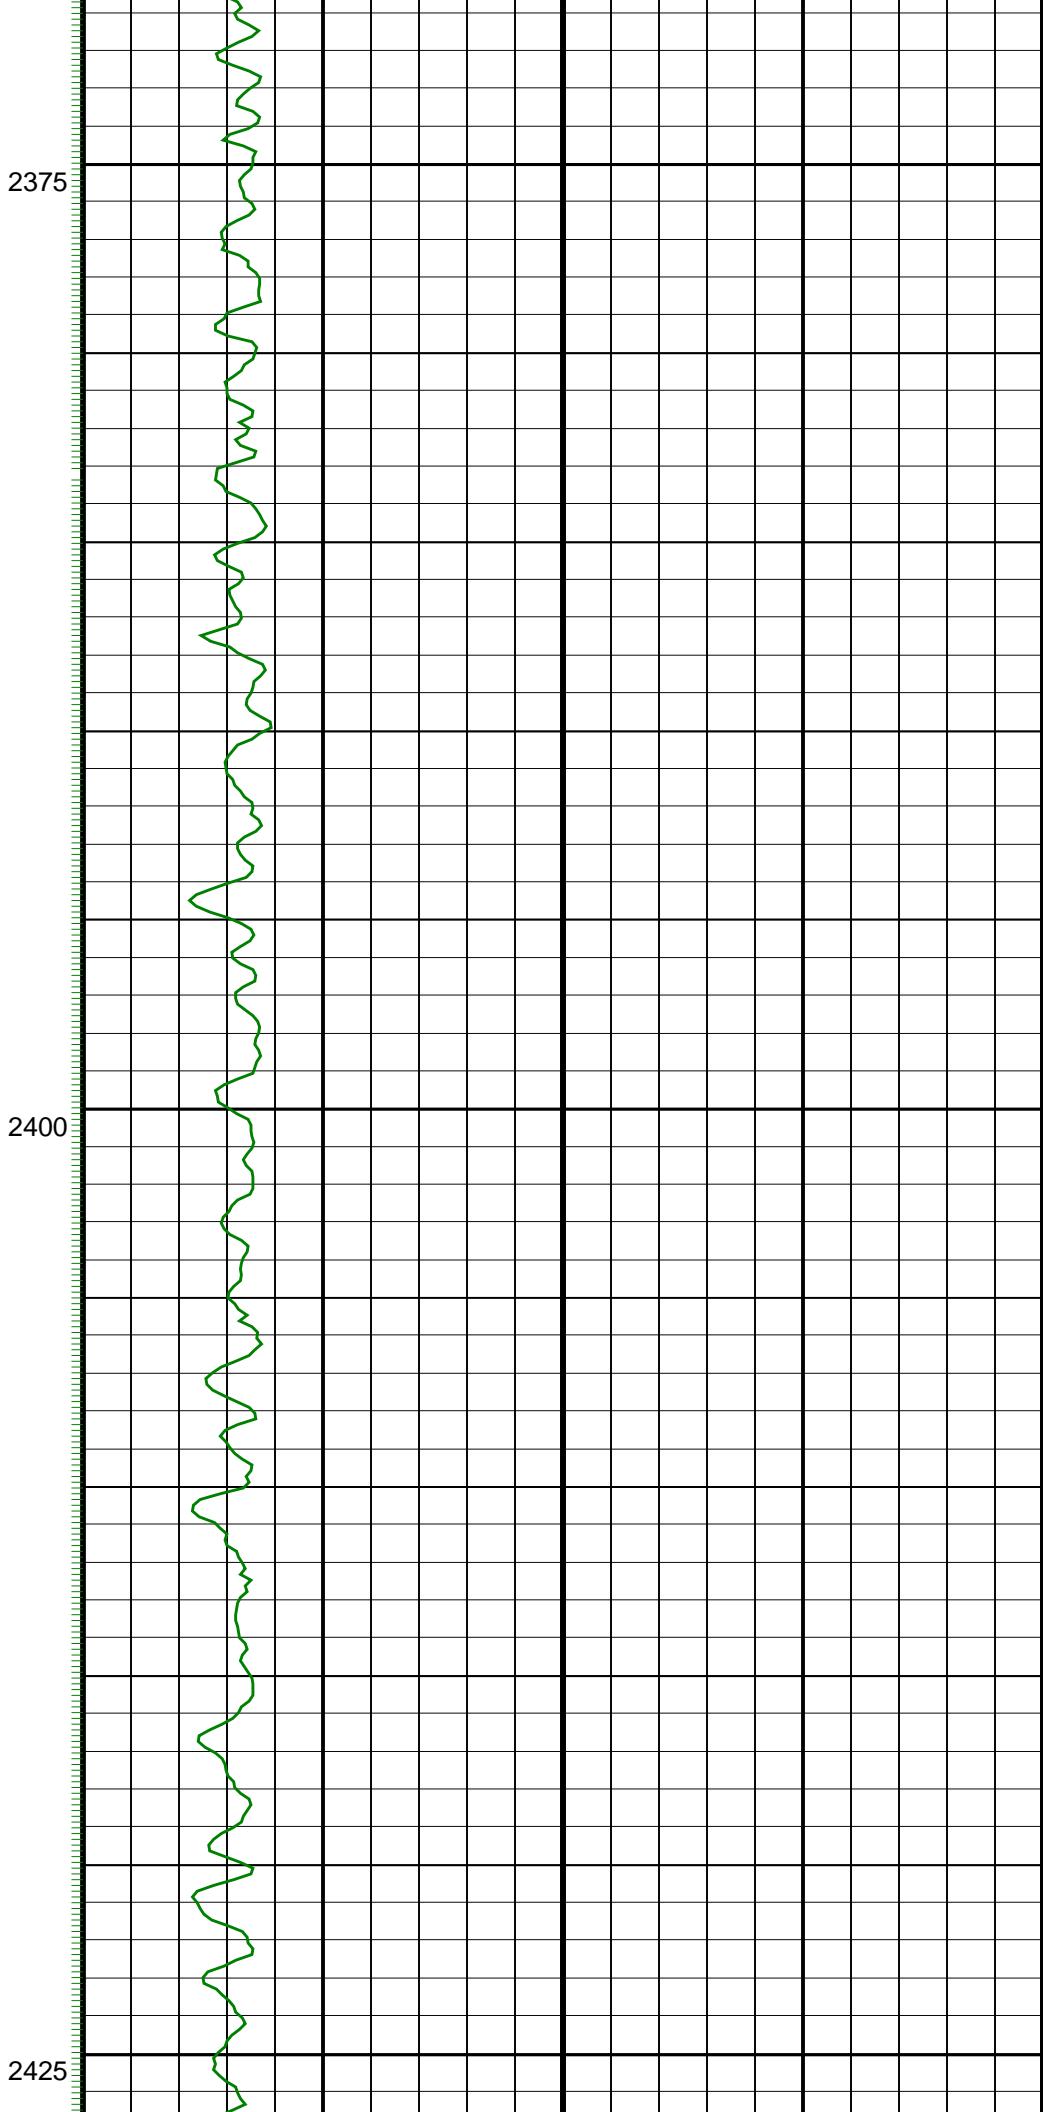

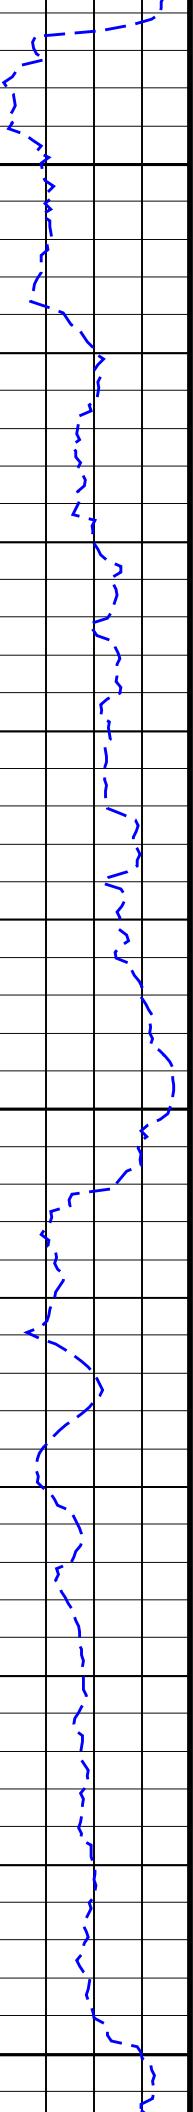

ROP5

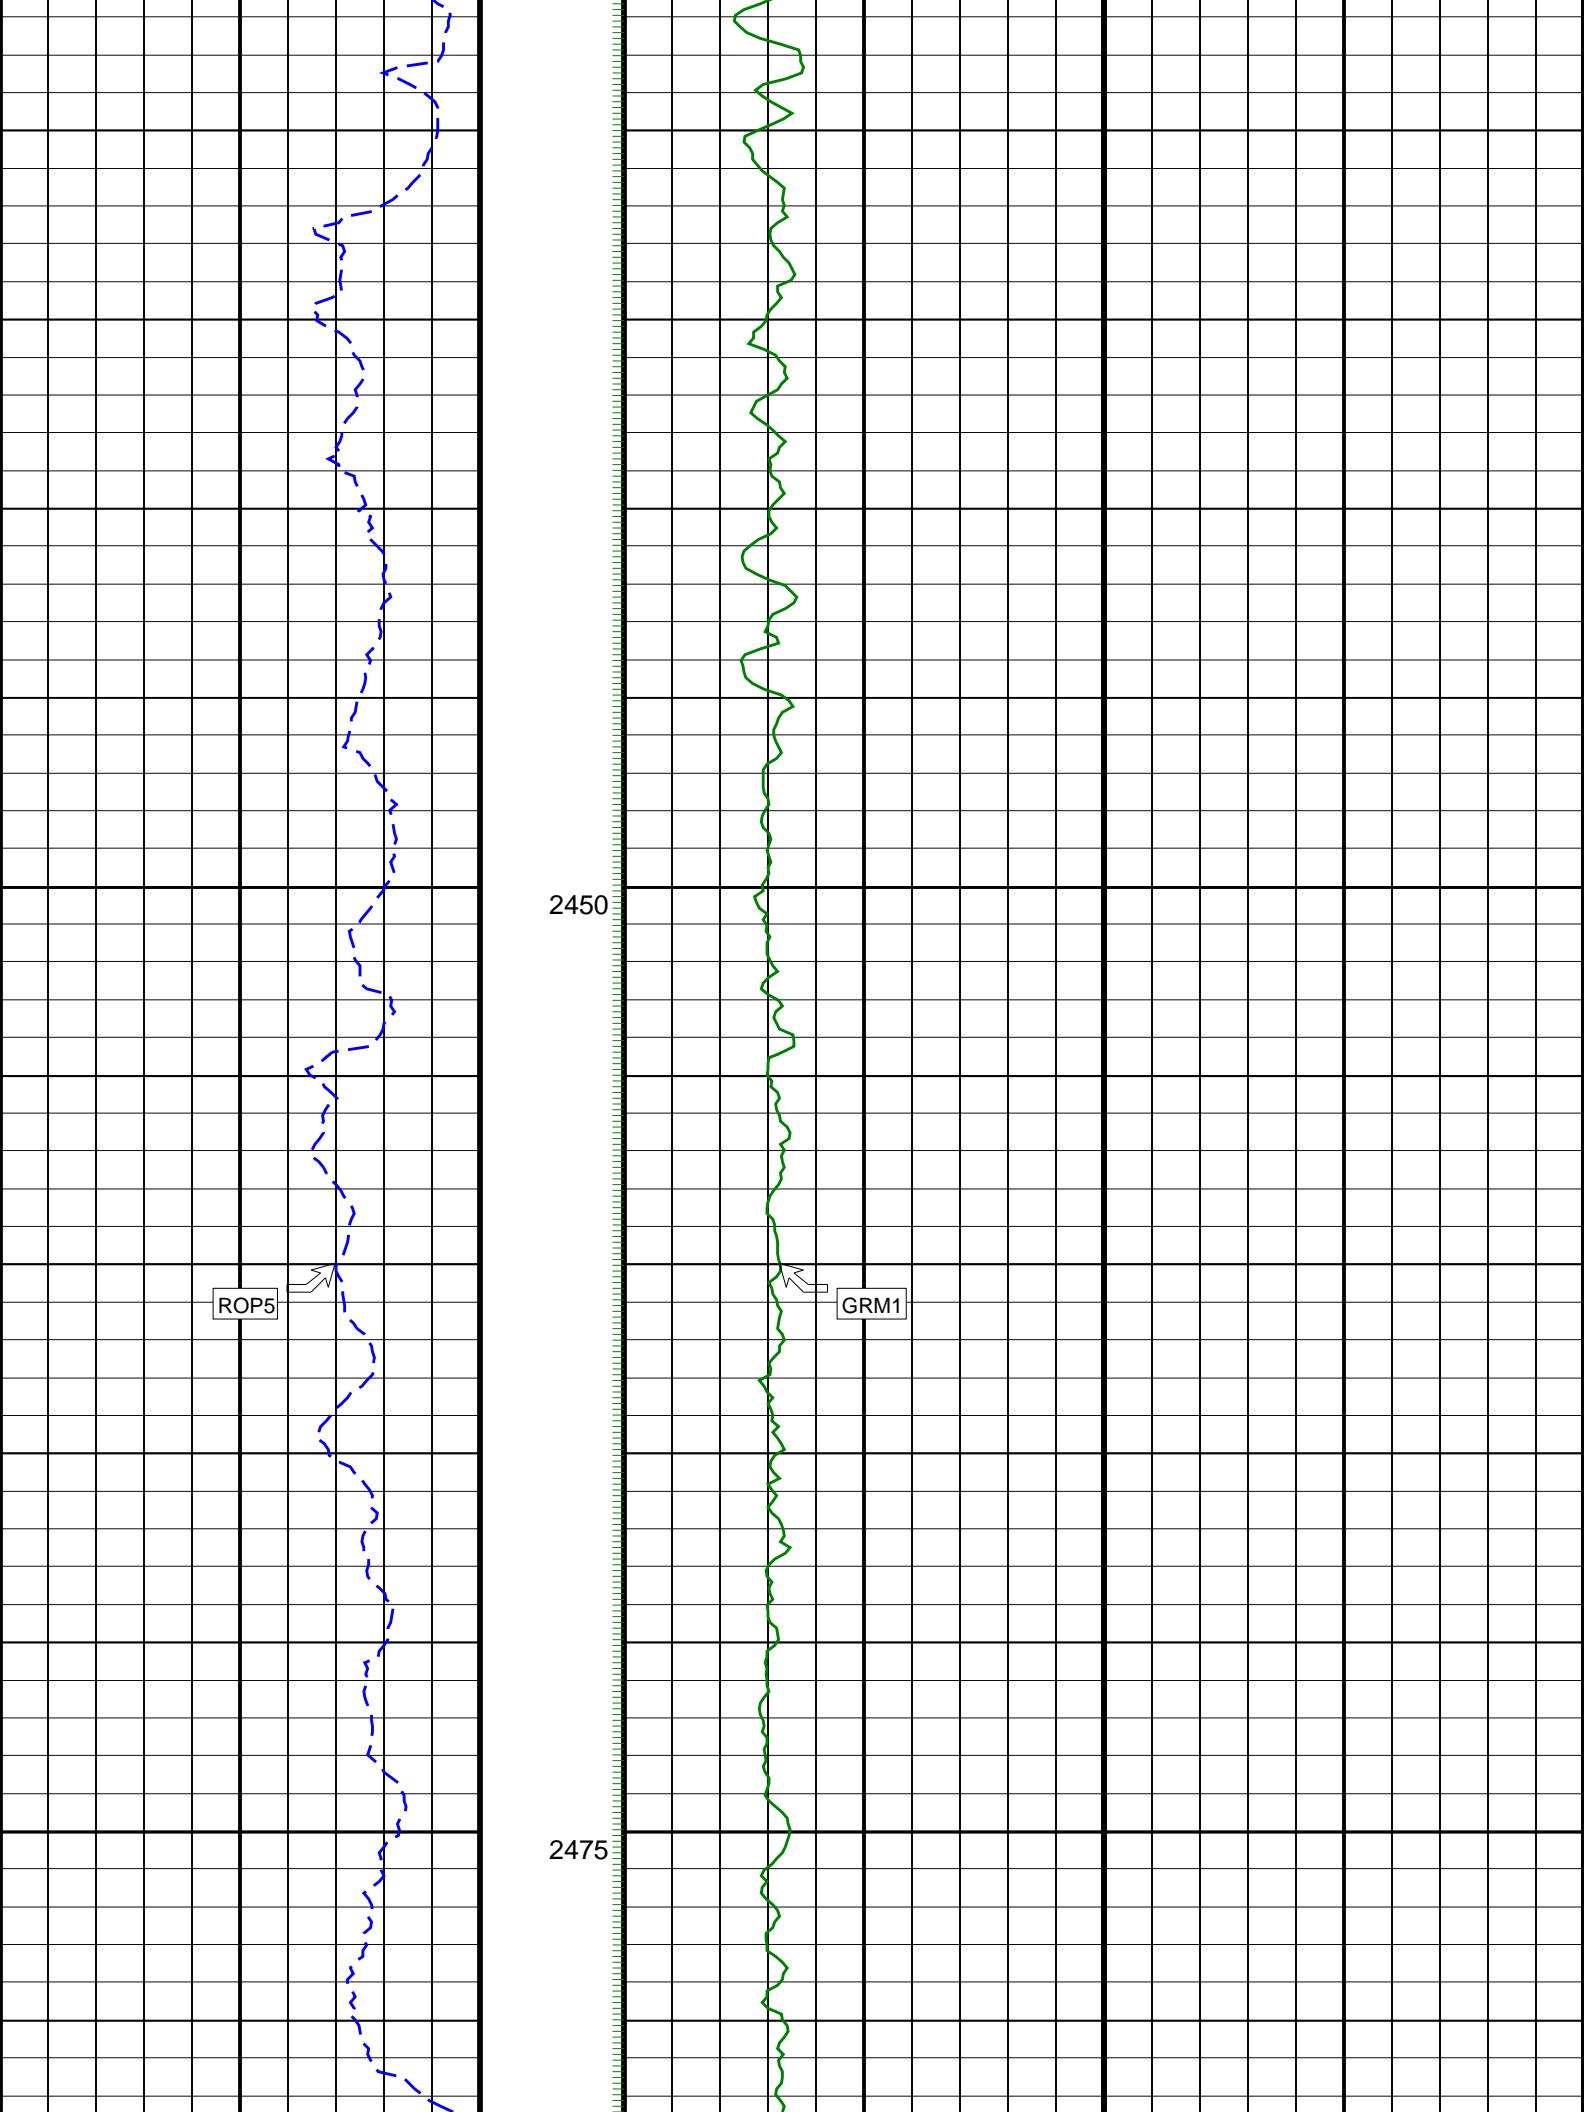

This figure displays two genomic tracks. The left track shows a blue dashed line representing the ROP5 gene, which has a long intron and a short exon. The right track shows a green wavy line representing the GRM1 gene, which has a very long intron and a short exon. Both tracks are plotted against a grid background.
