00:00 to 24:0	00 Hi	rs on 14	Nov	2009														
Operational Comments					CAR: 126/143 items closed (1 critical remaining) Top Stop Cards: #1 Noticed a man about to carry an awkward load using one hand on the handrail which would have made it dangerous. Stopped him and offered my assistance and we both carried the load to the bottom of the stairs safely. #2 Employee was using a "Q-Beam" light that was very large and bulky and was not secured. Stopped employee and explained to him to secure it while using the light over the hand rail or it could become a dropped object. Non-compliance trends: Correct hand placement on handrails still not being observed. Tools need to be checked before and after use. DODI Supervisor audits conducted: 2 DODI Interventions conducted: 6 Woodside Interventions conducted: 3 Daily Environmental Checklist findings: Diesel fill hoses and nozzles checked and drip free. Held End Of Well party on helideck. A good time was had by all.
